JOURNAL OF AIRCRAFT
Vol. 49, No. 6, November–December 2012

2012 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 2105–2112, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 2113–2115, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2116–2122, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2011, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, SHORT/ VERTICAL TAKEOFF AND LANDING

Aerodynamics

C12-100 ZONA6 Versus the Doublet-Lattice Method for Unsteady Aerodynamics on Lifting Surfaces
C12-162 Stereoscopic Particle Image Velocimetry Flowfield Investigation of an Unmanned Combat Air Vehicle
C12-093 Aeroelastic Model of Multisegmented Folding Wings: Theory and Experiment
C12-095 Computational Fluid Dynamics Predictions of Stability Derivatives for Airship
C12-098 Computational Fluid Dynamics Analysis of an Optimized Load-Distribution Propeller
C12-016 Form Factor and Critical Mach Number Estimation for Finite Wings
C12-007 Mesh Deformation Method for Rotor Flows
C12-075 Model for Estimating Unsteady Force Derivatives
C12-161 Static and Forced-Oscillation Tests of a Generic Unmanned Combat Air Vehicle
C12-014 Investigation of the Drag Characteristics of Stratosphere Airships for Different Cusp Shapes
C12-019 Detailed Observations of Interactions of Wingtip Vortices in Close-Formation Flight
C12-087 Effect of Aspect Ratio on Flow Through Serpentine Nozzles
C12-091 Experimental and Computational Assessment of a Ducted-Fan Rotor Flow Model
C12-101 Effects on the Boundary Layer Caused by Inclusion of Dimples at Varying Depths
C12-059 Effect of the Transient Nature of Flow on Annular Parachute Drag Prediction
C12-079 Numerical Investigation of the Aerodynamic and Structural Characteristics of a Corrugated Airfoil
C12-092 Steady Aerodynamics of Miniature Trailing-Edge Devices in Transonic Flows
C12-187 Lobe Balancing Design Method to Create Frozen Sonic Booms Using Aircraft Components
C12-160 Integrated Computational/Experimental Approach to Unmanned Combat Air Vehicle Stability and Control Estimation
C12-174 Review of Turbulent Boundary-Layer Models for Acoustic Analysis
C12-179 Response Surface Method Application to High-Lift Configuration with Active Flow Control
C12-202 Computational Study of the Embedded Engine Static Pressure Thrust Propulsion System
C12-173 Skin-Friction Predictions on a Hovering Tilt-Rotor Blade
C12-163 Stability and Control Analysis for an Unmanned Aircraft Configuration Using System-Identification Techniques
C12-199 Effects of Sweep and Nonplanarity on a Delta-Winged Biplane
C12-203 Numerical Simulation of Wall-Pressure Fluctuations Due to a Turbulent Boundary Layer
C12-198 Interference Effect of Engine Exhaust on Civil Aircraft Drag Performance
C12-175 Aerodynamics of Multifunctional Transport Aircraft Devices
C12-186 Experimental and Numerical Investigation of a Contrarotating Open-Rotor Flowfield
C12-188 Interference Drag Modeling and Experiments for a High-Reynolds-Number Transonic Wing
C12-209 Numerical Investigation of a NACA 0012 Airfoil in Oscillatory Motions
C12-189 Flow Control of a Slender Blunt-Nose Body at High Angles of Attack
C12-153 Stereoscopic Particle-Image-Velocimetry-Based Integral Load Determination on an Aircraft Propeller
C12-126 Experimental Study into the Flow Physics of Three-Dimensional Shock Control Bumps
C12-133 Numerical Investigation on Aerodynamic Characteristics of a Compound Wing-in-Ground Effect
C12-115 Nonlinear Large Angle Solutions of the Blade Element Momentum Theory Propeller Equations
C12-112 Adjoint Optimization of a Wing Using the Class-Shape-Refinement-Transformation Method
C12-137 Numerical Analysis of Effects of Leading-Edge Protuberances on Aircraft Wing Performance
C12-108 Evaluation and Characterization of a Lateral Synthetic Jet Actuator
C12-103 Morphing Airfoil Design for Minimum Drag and Actuation Energy Including Aerodynamic Work
C12-151 Rapid-Prototyping Method for Modeling a Circulation-Control Wing at Low Speeds
C12-053 Multiblade Reduced-Order Aerodynamics for State-Space Aeroelastic Modeling of Rotors
C12-114 Modeling the Nonlinear Dynamic Roll of Generic Fighter Using Delayed Detached-Eddy Simulation
C12-159 Numerical Simulation of Rotor Flowfields Based on Several Spatial Discretization Schemes
C12-043 Experimental Estimation of the Rotary Damping Coefficients of a Pliant Wing
C12-041 Multi-Objective Optimization of Helicopter Airfoils Using Surrogate-Assisted Memetic Algorithms
C12-064 Optimization of Flatback Airfoils for Wind-Turbine Blades Using a Genetic Algorithm
C12-015 Drag Reduction Methodology for Adaptive Tailless Aircraft
C12-030 High-Incidence Airfoil Lift and Drag Estimates
C12-006 Experimental Study of Half-Delta Wing Vortex Generator for Flow Separation Control
C12-060 Experimental and Theoretical Investigation of Ground Effect at Low Reynolds Numbers
C12-066 Design and Optimization of Tidal Turbine Airfoil
C12-113 FENSAP-ICE: Unsteady Conjugate Heat Transfer Simulation of Electrothermal De-Icing
C12-166 Flow Physics Analyses of a Generic Unmanned Combat Aerial Vehicle Configuration
C12-024 Penalties of Nonoptimal Turnback Maneuvers

C12-017 Experimental Investigation of a Morphable Biplane
C12-135 Unsteady Aerodynamics of a Morphing Tandem-Wing Unmanned Aerial Vehicle
C12-150 Fast Unstructured-Mesh Finite-Element Method for Nonlinear Subsonic Flow
C12-012 Nondimensional Modeling of Ducted-Fan Aerodynamics
C12-131 Wing–Body Circulation Control by Means of a Fuselage Trailing Edge
C12-164 Engineering Methods Applied to an Unmanned Combat Air Vehicle Configuration
C12-145 Aerodynamic and Aeroacoustic Analysis of Installed Pusher-Propeller Aircraft Configurations
C12-138 Computation of Flow Field Around an Airfoil with Leading-Edge Protuberances
C12-146 Airfoil Thickness Effects on the Thrust Generation of Plunging Airfoils
C12-157 Drag Reduction for Sweptback Grid Fin with Blunt and Sharp Leading Edges
C12-050 Longitudinal Aerodynamics of Rapidly Pitching Fixed-Wing Micro Air Vehicles
C12-139 Complete Computational Fluid Dynamics Analysis of a Velocity XL with Flight-Test Verification
C12-165 Three Unstructured Computational Fluid Dynamics Studies on Generic Unmanned Combat Aerial Vehicle
C12-070 Investigation of Aerodynamic Parameters of a Hybrid Airship
C12-055 Leading-Edge Radius Effects on Aerodynamic Characteristics of 50-Degree Delta Wings

Aeroelasticity and Aeroservoelasticity

C12-100 ZONA6 Versus the Doublet-Lattice Method for Unsteady Aerodynamics on Lifting Surfaces
C12-007 Mesh Deformation Method for Rotor Flows
C12-081 Framework for Aeroservoelastic Analyses Involving Nonlinear Actuators
C12-093 Aeroelastic Model of Multisegmented Folding Wings: Theory and Experiment
C12-181 Tiltrotor Wing-Root Vibratory Loads Reduction Through Higher Harmonic Control Actuation
C12-180 Reduced-Order Modeling of Transonic Flutter and Limit-Cycle Oscillations Using Sparse Volterra Series
C12-170 Shape, Structure, and Kinematic Parameterization of a Pov er-Optimal Hovering Wing
C12-172 Analysis of Twin Turboprop Aircraft Whirl-Flutter Stab lity Boundaries
C12-207 Applica'ion of Pattern Search in Worst-Case Flutter Solution
C12-129 Multifidelity, Multistrategy, and Multidisciplinary Design Optimization Environment
C12-053 Multiblade Reduced-Order Aerodynamics for State-Space Aeroelastic Modeling of Rotors
C12-048 Aeroservoelastic Design Optimization of a Flexible Wing
C12-102 Adaptive Reduced-Order-Model-Based Control-Law Design for Active Flutter Suppression
C12-043 Experimental Estimation of the Rotary Damping Coefficients of a Pliant Wing
C12-071 Aeroelasticity of a Helicopter Blade Using the Euler Equations
C12-094 Linearized Euler Solver for Rapid Frequency-Domain Aeroelastic Analysis
C12-035 Supersonic Flutter Analysis of Vehicles at Incidence Based on Local Piston Theory
C12-029 Structural and Aeroelastic Characteristics of Truss-Braced Wings: A Parametric Study
C12-069 Identification of Aerodynamic Derivatives of a Flexible Aircraft
C12-123 How Structural Model Variability Influences Transonic Aeroelastic Stability
Aerospace
Plane
C12-097 Trial Input Method and Own-Aircraft State Prediction in Autonomous Air Combat

Air Transportation

C12-190 Fuel Burn and CO_2 Systemwide Assessment of Environmentally Responsible Aviation Technologies
C12-201 Wind Effect on the Construction of Instrument Flight Procedures Using a Turkish Wind Model
C12-193 Systematic Procedure for Taxi-Route Conformance Monitoring
C12-140 Tradeoff Between Contrail Reduction and Emissions in United States National Airspace
C12-132 Quantitative Prediction of the Idealized Performance of Aircraft with Outboard-Horizontal Stabilizers
C12-175 Aerodynamics of Multifunctional Transport Aircraft Devices
C12-020 En Route Speed Reduction Concept for Absorbing Air Traffic Flow Management Delays
C12-037 Framework for Aircraft Trajectory Planning Toward an Efficient Air Traffic Management
C12-104 Configuration of the Multibubble Pressure Cabin in Blended-Wing/Body
C12-136 Influence of Offdesign Performance on Design Synthesis of Laminar Aircraft
C12-013 Allocation and Design of Aircraft for On-Demand Air Transportation with Uncertain Operations
C12-022 Sequential Dynamic Strategies for Real-Time Scheduling of Terminal Traffic
Airframe-Propulsion
Integration
C12-202 Computational Study of the Embedded Engine Static Pressure Thrust Propulsion System
C12-087 Effect of Aspect Ratio on Flow Through Serpentine Nozzles
C12-158 Determination of the Terminal Shock in Two-Dimensional Supersonic Inlets
C12-046 Exhaust Nozzle Plume Effects on Sonic Boom
C12-151 Rapid-Prototyping Method for Modeling a Circulation-Control Wing at Low Speeds
Cabin Environment, Crew Training, and Life Support
C12-104 Configuration of the Multibubble Pressure Cabin in Blended-Wing/Body
C12-085 Comparison Study of Membrane Dehumidification Aircraft Environmental Control Systems

Collision Avoidance

C12-073 Requirements, Issues, and Challenges for Sense and Avoid in Unmanned Aircraft Systems
Communication
and Air Traffic Control
C12-141 Assisting Air Traffic Controllers in Planning and Monitoring Continuous-Descent Approaches
C12-193 Systematic Procedure for Taxi-Route Conformance Monitoring

Configuration Design

C12-187 Lobe Balancing Design Method to Create Frozen Sonic Booms Using Aircraft Components
C12-016 Form Factor and Critical Mach Number Estimation for Finite Wings
C12-197 Optimizing Families of Reconfigurable Aircraft for Multiple Missions
C12-199 Effects of Sweep and Nonplanarity on a Delta-Winged Biplane
C12-202 Computational Study of the Embedded Engine Static Pressure Thrust Propulsion System
C12-015 Drag Reduction Methodology for Adaptive Tailless Aircraft
C12-137 Numerical Analysis of Effects of Leading-Edge Protuberances on Aircraft Wing Performance
C12-184 Multidisciplinary Design Optimization of Medium-Range Transonic Truss-Braced Wing Transport Aircraft
C12-136 Influence of Offdesign Performance on Design Synthesis of Laminar Aircraft
C12-131 Wing–Body Circulation Control by Means of a Fuselage Trailing Edge
C12-017 Experimental Investigation of a Morphable Biplane

Deceleration Systems

C12-059 Effect of the Transient Nature of Flow on Annular Parachute Drag Prediction
C12-038 Low-Cost High-Altitude Low-Opening Cargo Airdrop Systems
C12-057 Evaluation of Multibody Parafoil Dynamics Using Distributed Miniature Wireless Sensors
C12-192 Multibody Analysis of the Terminal Phase for a Reentry Vehicle: A Comparative Study

Economics

C12-020 En Route Speed Reduction Concept for Absorbing Air Traffic Flow Management Delays
C12-074 Application of Value-Driven Design to Commercial Aeroengine Systems

Flight Control Integration

C12-083 Composite Control of Stratospheric Airships with Moving Masses Flight Mechanics
C12-083 Composite Control of Stratospheric Airships with Moving Masses
C12-082 Multistate Design Approach to Analysis of Twin-Engine Aircraft Performance Robustness
C12-160 Integrated Computational/Experimental Approach to Unmanned Combat Air Vehicle Stability and Control Estimation
C12-081 Framework for Aeroservoelastic Analyses Involving Nonlinear Actuators
C12-210 Modeling the Pilot Detection of Time-Varying Aircraft Dynamics
C12-175 Aerodynamics of Multifunctional Transport Aircraft Devices
C12-122 Autorotational Spin Evolving Toward Chaos
C12-057 Evaluation of Multibody Parafoil Dynamics Using Distributed Miniature Wireless Sensors

C12-024 Penalties of Nonoptimal Turnback Maneuvers
C12-015 Drag Reduction Methodology for Adaptive Tailless Aircraft
C12-031 Nonlinear Modeling of Cascade Fin Aerodynamics Using Kirchhoff's Steady-State Stall Model
C12-008 Multistage-Fusion Algorithm for Estimation of Aerodynamic Angles in Mini Aerial Vehicle
C12-018 Performance, Flight Testing of Shrouded Rotor Micro Air Vehicle in Edgewise Gusts
C12-056 Numerical Investigations on Flow Control over Blended-Wing/Body Transonic Aircraft Using Synthetic-Jet Actuators
C12-069 Identification of Aerodynamic Derivatives of a Flexible Aircraft
C12-142 Parafoil Control Authority with Upper-Surface Canopy Spoilers

Flight Operations

C12-183 Performance Flexibility of Reconfigurable Families of Unmanned Aerial Vehicles
C12-201 Wind Effect on the Construction of Instrument Flight Procedures Using a Turkish Wind Model
C12-080 Evaluating Concepts for Operations in Metroplex Terminal Area Airspace
C12-136 Influence of Offdesign Performance on Design Synthesis of Laminar Aircraft
C12-149 Optimization of Unpowered Descents of Commercial Aircraft in Altitude-Dependent Winds
C12-037 Framework for Aircraft Trajectory Planning Toward an Efficient Air Traffic Management

Flow Control

C12-171 Hybrid Reynolds-Averaged Navier–Stokes/Large-Eddy Simulation Investigating Control of Flow over a Turret
C12-092 Steady Aerodynamics of Miniature Trailing-Edge Devices in Transonic Flows
C12-126 Experimental Study into the Flow Physics of Three-Dimensional Shock Control Bumps
C12-189 Flow Control of a Slender Blunt-Nose Body at High Angles of Attack
C12-179 Response Surface Method Application to High-Lift Configuration with Active Flow Control
C12-020 En Route Speed Reduction Concept for Absorbing Air Traffic Flow Management Delays
C12-010 Dynamic Roughness as a Means of Leading-Edge Separation Flow Control
C12-108 Evaluation and Characterization of a Lateral Synthetic Jet Actuator
C12-144 Numerical Study of Active Flow Control on a High-Lift Configuration
C12-056 Numerical Investigations on Flow Control over Blended-Wing/Body Transonic Aircraft Using Synthetic-Jet Actuators
C12-142 Parafoil Control Authority with Upper-Surface Canopy Spoilers
C12-131 Wing–Body Circulation Control by Means of a Fuselage Trailing Edge

General Aviation

C12-024 Penalties of Nonoptimal Turnback Maneuvers
C12-115 Nonlinear Large Angle Solutions of the Blade Element Momentum Theory Propeller Equations
C12-075 Model for Estimating Unsteady Force Derivatives

Ground Effect Machines

C12-060 Experimental and Theoretical Investigation of Ground Effect at Low Reynolds Numbers
C12-133 Numerical Investigation on Aerodynamic Characteristics of a Compound Wing-in-Ground Effect

Landing Dynamics

C12-205 Landing Gear Drop-Test Rig Development and Application for Light Airplanes

Lighter-Than-Air Systems

C12-070 Investigation of Aerodynamic Parameters of a Hybrid Airship
C12-083 Composite Control of Stratospheric Airships with Moving Masses

Man/Machine Interface

C12-141 Assisting Air Traffic Controllers in Planning and Monitoring Continuous-Descent Approaches
C12-177 Development and Evaluation of an Automated Path Planning Aid
C12-210 Modeling the Pilot Detection of Time-Varying Aircraft Dynamics

Micro Air Vehicles

C12-170 Shape, Structure, and Kinematic Parameterization of a Power-Optimal Hovering Wing
C12-199 Effects of Sweep and Nonplanarity on a Delta-Winged Biplane
C12-060 Experimental and Theoretical Investigation of Ground Effect at Low Reynolds Numbers
C12-067 Vibration Characteristics of the Wings of Micro Air Vehicles
C12-134 Experimental Study of an Extremely Flexible Rotor for Microhelicopters
C12-047 Wing Stiffness on Light Flapping Micro Aerial Vehicles
C12-146 Airfoil Thickness Effects on the Thrust Generation of Plunging Airfoils
C12-008 Multistage-Fusion Algorithm for Estimation of Aerodynamic Angles in Mini Aerial Vehicle

Military Missions

C12-036 Kronecker Product Method for the Exact Solution of Aircraft Vulnerability
C12-183 Performance Flexibility of Reconfigurable Families of Unmanned Aerial Vehicles
C12-038 Low-Cost High-Altitude Low-Opening Cargo Airdrop Systems

Noise

C12-109 Optimization of a Single-Slotted Lined Flap for Wing Trailing-Edge Noise Reduction
C12-191 Aircraft Shortest and Fastest Continuous-Descent Approach Development
C12-174 Review of Turbulent Boundary-Layer Models for Acoustic Analysis
C12-145 Aerodynamic and Aeroacoustic Analysis of Installed Pusher-Propeller Aircraft Configurations
C12-004 Vibro-Acoustic Optimization of Turbulent Boundary-Layer Excited Panel with Curvilinear Stiffeners
C12-119 Modal Analysis of the Aircraft Hydraulic-System Pipeline

Performance

C12-025 Optimum Transverse Span Loading for Subsonic Transport Category Aircraft
C12-137 Numerical Analysis of Effects of Leading-Edge Protuberances on Aircraft Wing Performance
C12-198 Interference Effect of Engine Exhaust on Civil Aircraft Drag Performance
Powerplant
Integration
C12-107 Preliminary Study on a Wide-Speed-Range Helicopter Rotor/Turboshaft System

Propeller and Rotor Systems

C12-098 Computational Fluid Dynamics Analysis of an Optimized Load-Distribution Propeller
C12-153 Stereoscopic Particle-Image-Velocimetry-Based Integral Load Determination on an Aircraft Propeller
C12-186 Experimental and Numerical Investigation of a Contrarotating Open-Rotor Flowfield
C12-173 Skin-Friction Predictions on a Hovering Tilt-Rotor Blade
C12-041 Multi-Objective Optimization of Helicopter Airfoils Using Surrogate-Assisted Memetic Algorithms
C12-115 Nonlinear Large Angle Solutions of the Blade Element Momentum Theory Propeller Equations
C12-134 Experimental Study of an Extremely Flexible Rotor for Microhelicopters
C12-012 Nondimensional Modeling of Ducted-Fan Aerodynamics
C12-145 Aerodynamic and Aeroacoustic Analysis of Installed Pusher-Propeller Aircraft Configurations

Rotorcraft

C12-007 Mesh Deformation Method for Rotor Flows
C12-186 Experimental and Numerical Investigation of a Contrarotating Open-Rotor Flowfield
C12-173 Skin-Friction Predictions on a Hovering Tilt-Rotor Blade
C12-181 Tiltrotor Wing-Root Vibratory Loads Reduction Through Higher Harmonic Control Actuation
C12-107 Preliminary Study on a Wide-Speed-Range Helicopter Rotor/Turboshaft System
C12-153 Stereoscopic Particle-Image-Velocimetry-Based Integral Load Determination on an Aircraft Propeller
C12-125 Hydromechanical Analysis of a Fluid–Elastomeric Lag Damper Incorporating Temperature Effects
C12-053 Multiblade Reduced-Order Aerodynamics for State-Space Aeroelastic Modeling of Rotors
C12-106 Ship-Helicopter Operating Limits Prediction Using Piloted Flight Simulation and Time-Accurate Airwakes
C12-159 Numerical Simulation of Rotor Flowfields Based on Several Spatial Discretization Schemes
C12-044 Correlation of Aeroelastic Response and Structural Loads for a Rotor in Descent

C12-147 In Situ Velocity Measurements in the Near Wake of a Ship Superstructure
C12-071 Aeroelasticity of a Helicopter Blade Using the Euler Equations

Safety

C12-072 New Linear Programming-Based Bound Method for Structural System Reliability
C12-118 Pilot Performance in Centrifuge-Based Simulation of Unusual Attitude Recovery
C12-128 Self-Monitoring Activities for Autonomous Fight Data Analysis
C12-023 Nonprobabilistic Reliability Analysis for an Inside Flap of an Aircraft
C12-002 Human in the Loop: Predicted Likelihood of Vehicular Mission Success and Safety
C12-063 In-Flight Icing Risk Management Through Computational Fluid Dynamics-Icing Analysis

Simulation

C12-204 Research on Effects of Oblique Struts on Crashworthiness of Composite Fuselage Sections
C12-106 Ship-Helicopter Operating Limits Prediction Using Piloted Flight Simulation and Time-Accurate Airwakes
C12-151 Rapid-Prototyping Method for Modeling a Circulation-Control Wing at Low Speeds
C12-118 Pilot Performance in Centrifuge-Based Simulation of Unusual Attitude Recovery
C12-026 Methods for Analyzing Nose Gear During Landing Using Structural Finite Element Analysis
C12-056 Numerical Investigations on Flow Control over Blended-Wing/Body Transonic Aircraft Using Synthetic-Jet Actuators
C12-051 Positioning Algorithm for Autonomous Thermal Soaring

SHORT/VERTICAL TAKEOFF AND LANDING AND SHORT TAKEOFF/VERTICAL LANDING

C12-130 Aerodynamic Loading Characteristics of a Model-Scale Helicopter in a Ship's Airwake Structural
Design (Including Loads)
C12-170 Shape, Structure, and Kinematic Parameterization of a Power-Optimal Hovering Wing
C12-021 Structural Optimization of a Nose Landing Gear Considering Its Fatigue Life
C12-025 Optimum Transverse Span Loading for Subsonic Transport Category Aircraft
C12-204 Research on Effects of Oblique Struts on Crashworthiness of Composite Fuselage Sections
C12-168 Effectiveness of Wing Twist Morphing in Roll Control
C12-029 Structural and Aeroelastic Characteristics of Truss-Braced Wings: A Parametric Study
C12-034 Experimental Nonlinear Static Deflections of a Subscale Joined Wing
C12-077 Structural Topology Optimization of a Pylon's Mount Using Ant Colony Algorithms
C12-023 Nonprobabilistic Reliability Analysis for an Inside Flap of an Aircraft
C12-026 Methods for Analyzing Nose Gear During Landing Using Structural Finite Element Analysis
C12-148 Design and Application of Cross-Shaped Cellular Honeycombs for a Variable-Camber Wing

Structural Materials

C12-148 Design and Application of Cross-Shaped Cellular Honeycombs for a Variable-Camber Wing
C12-200 Deformation Analysis of Composite Rotor Blades for a Helicopter

System Effectiveness

C12-036 Kronecker Product Method for the Exact Solution of Aircraft Vulnerability
C12-032 Method for Assessing Unmanned Aerial Vehicle Vulnerability to High-Energy Laser Weapon

Testing, Flight and Ground

C12-090 Stochastic Modeling of Structural Uncertainty/Variability from Ground Vibration Modal Test Data
C12-075 Model for Estimating Unsteady Force Derivatives
C12-110 Real-Time Aerodynamic Parameter Estimation Without Airflow Angle Measurements
C12-127 Methodology for Conducting Scaled Sonic-Boom Flight Tests Using Unmanned Aircraft Systems
C12-185 Flight Test Maneuvers for Efficient Aerodynamic Modeling
C12-049 Method for the Measurement of the Inertia Properties of Bodies with Aerofoils
C12-139 Complete Computational Fluid Dynamics Analysis of a Velocity XL with Flight-Test Verification
C12-034 Experimental Nonlinear Static Deflections of a Subscale Joined Wing

Uninhabited and Unmanned Air Vehicles

C12-162 Stereoscopic Particle Image Velocimetry Flowfield Investigation of an Unmanned Combat Air Vehicle
C12-091 Experimental and Computational Assessment of a Ducted-Fan Rotor Flow Model
C12-097 Trial Input Method and Own-Aircraft State Prediction in Autonomous Air Combat
C12-032 Method for Assessing Unmanned Aerial Vehicle Vulnerability to High-Energy Laser Weapon
C12-197 Optimizing Families of Reconfigurable Aircraft for Multiple Missions
C12-183 Performance Flexibility of Reconfigurable Families of Unmanned Aerial Vehicles
C12-073 Requirements, Issues, and Challenges for Sense and Avoid in Unmanned Aircraft Systems
C12-127 Methodology for Conducting Scaled Sonic-Boom Flight Tests Using Unmanned Aircraft Systems
C12-182 Mission Performance of the Tempest Unmanned Aircraft System in Supercell Storms
C12-108 Evaluation and Characterization of a Lateral Synthetic Jet Actuator
C12-166 Flow Physics Analyses of a Generic Unmanned Combat Aerial Vehicle Configuration
C12-017 Experimental Investigation of a Morphable Biplane
C12-051 Positioning Algorithm for Autonomous Thermal Soaring
C12-028 Multifunctional Unmanned Aerial Vehicle Wing Spar for Low-Power Generation and Storage
C12-165 Three Unstructured Computational Fluid Dynamics Studies on Generic Unmanned Combat Aerial Vehicle
C12-012 Nondimensional Modeling of Ducted-Fan Aerodynamics

Vibration

C12-125 Hydromechanical Analysis of a Fluid–Elastomeric Lag Damper Incorporating Temperature Effects
C12-090 Stochastic Modeling of Structural Uncertainty/Variability from Ground Vibration Modal Test Data
C12-003 Monitor of Remote Control Vehicle via Approximate Gabor Transform of Their Acoustic Signatures
C12-004 Vibro-Acoustic Optimization of Turbulent Boundary-Layer Excited Panel with Curvilinear Stiffeners
C12-067 Vibration Characteristics of the Wings of Micro Air Vehicles

Weather Hazards

C12-063 In-Flight Icing Risk Management Through Computational Fluid Dynamics-Icing Analysis

COMPUTING, INFORMATION, AND COMMUNICATION

Artificial Intelligence Systems

C12-128 Self-Monitoring Activities for Autonomous Fight Data Analysis

Air Traffic Control Systems

C12-022 Sequential Dynamic Strategies for Real-Time Scheduling of Terminal Traffic
C12-193 Systematic Procedure for Taxi-Route Conformance Monitoring
C12-080 Evaluating Concepts for Operations in Metroplex Terminal Area Airspace

Autonomous Systems

C12-128 Self-Monitoring Activities for Autonomous Fight Data Analysis

Controls and Displays

C12-177 Development and Evaluation of an Automated Path Planning Aid

ENERGY

Fuel Economy

C12-052 Game Theory Analysis of the Impact of Single-Aisle Aircraft Competition on Emissions
C12-051 Positioning Algorithm for Autonomous Thermal Soaring

Wind Power

C12-009 Inboard Stall Delay due to Rotation
C12-030 High-Incidence Airfoil Lift and Drag Estimates
C12-064 Optimization of Flatback Airfoils for Wind-Turbine Blades Using a Genetic Algorithm

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

C12-142 Parafoil Control Authority with Upper-Surface Canopy Spoilers

FLUID DYNAMICS

Aeroacoustics

C12-174 Review of Turbulent Boundary-Layer Models for Acoustic Analysis
C12-203 Numerical Simulation of Wall-Pressure Fluctuations Due to a Turbulent Boundary Layer
C12-187 Lobe Balancing Design Method to Create Frozen Sonic Booms Using Aircraft Components
C12-109 Optimization of a Single-Slotted Lined Flap for Wing Trailing-Edge Noise Reduction
C12-127 Methodology for Conducting Scaled Sonic-Boom Flight Tests Using Unmanned Aircraft Systems

Boundary Layers and Heat Transfer: Turbulent

C12-009 Inboard Stall Delay due to Rotation

Boundary-Layer Stability and Transition

C12-176 Evaluation of a Correlation-Based Transition Model and Comparison with the eN Method
C12-171 Hybrid Reynolds-Averaged Navier–Stokes/Large-Eddy Simulation Investigating Control of Flow over a Turret
C12-101 Effects on the Boundary Layer Caused by Inclusion of Dimples at Varying Depths

Computational Fluid Dynamics

C12-099 Unsteady Reynolds-Averaged Navier–Stokes-Based Hybrid Methodologies for Rotor–Fuselage Interaction
C12-084 Adjoint-Based Aerodynamic Optimization of Supersonic Biplane Airfoils
C12-120 Uncertainty Quantification of Two-Dimensional Wake Vortices Near the Ground
C12-171 Hybrid Reynolds-Averaged Navier–Stokes/Large-Eddy Simulation Investigating Control of Flow over a Turret
C12-160 Integrated Computational/Experimental Approach to Unmanned Combat Air Vehicle Stability and Control Estimation
C12-059 Effect of the Transient Nature of Flow on Annular Parachute Drag Prediction
C12-176 Evaluation of a Correlation-Based Transition Model and Comparison with the eN Method
C12-203 Numerical Simulation of Wall-Pressure Fluctuations Due to a Turbulent Boundary Layer
C12-179 Response Surface Method Application to High-Lift Configuration with Active Flow Control
C12-112 Adjoint Optimization of a Wing Using the Class-Shape-Refinement-Transformation Method
C12-133 Numerical Investigation on Aerodynamic Characteristics of a Compound Wing-in-Ground Effect
C12-188 Interference Drag Modeling and Experiments for a High-Reynolds-Number Transonic Wing
C12-094 Linearized Euler Solver for Rapid Frequency-Domain Aeroelastic Analysis
C12-114 Modeling the Nonlinear Dynamic Roll of Generic Fighter Using Delayed Detached-Eddy Simulation
C12-159 Numerical Simulation of Rotor Flowfields Based on Several Spatial Discretization Schemes
C12-041 Multi-Objective Optimization of Helicopter Airfoils Using Surrogate-Assisted Memetic Algorithms
C12-071 Aeroelasticity of a Helicopter Blade Using the Euler Equations
C12-063 In-Flight Icing Risk Management Through Computational Fluid Dynamics-Icing Analysis
C12-062 Simulation of Supercooled Large Droplet Impingement via Reduced-Order Technology
C12-010 Dynamic Roughness as a Means of Leading-Edge Separation Flow Control
C12-113 FENSAP-ICE: Unsteady Conjugate Heat Transfer Simulation of Electrothermal De-Icing
C12-152 Entropy-Based Drag-Error Estimation and Mesh Adaptation in Two Dimensions
C12-150 Fast Unstructured-Mesh Finite-Element Method for Nonlinear Subsonic Flow
C12-166 Flow Physics Analyses of a Generic Unmanned Combat Aerial Vehicle Configuration
C12-157 Drag Reduction for Sweptback Grid Fin with Blunt and Sharp Leading Edges
C12-144 Numerical Study of Active Flow Control on a High-Lift Configuration
C12-164 Engineering Methods Applied to an Unmanned Combat Air Vehicle Configuration
C12-139 Complete Computational Fluid Dynamics Analysis of a Velocity XL with Flight-Test Verification
C12-138 Computation of Flow Field Around an Airfoil with Leading-Edge Protuberances
C12-146 Airfoil Thickness Effects on the Thrust Generation of Plunging Airfoils
C12-042 Numerical Study of Propeller Slipstream Based on Unstructured Dynamic Overset Grids
C12-165 Three Unstructured Computational Fluid Dynamics Studies on Generic Unmanned Combat Aerial Vehicle
C12-045 Aeroelastic Analysis of Aircraft Wind-Tunnel Model Coupling Structural and Fluid Dynamic Codes

Hydrodynamics

C12-138 Computation of Flow Field Around an Airfoil with Leading-Edge Protuberances
C12-066 Design and Optimization of Tidal Turbine Airfoil

Inlet, Nozzle, Diffuser, and Channel Flows

C12-208 Test Technique for the Measurement of Intake Drag of Airbreathing Vehicles
C12-087 Effect of Aspect Ratio on Flow Through Serpentine Nozzles
C12-088 Computational Study of a High-Performance Submerged Inlet with Bleeding Vortex

Jets, Wakes, and Viscid–Inviscid Flow Interactions

C12-046 Exhaust Nozzle Plume Effects on Sonic Boom
C12-086 Statistical Determination of Vertical Resolution Requirements for Real-Time Wake-Vortex Prediction

Separated Flows

C12-009 Inboard Stall Delay due to Rotation
C12-144 Numerical Study of Active Flow Control on a High-Lift Configuration
C12-147 In Situ Velocity Measurements in the Near Wake of a Ship Superstructure
C12-010 Dynamic Roughness as a Means of Leading-Edge Separation Flow Control

Subsonic Flow

C12-101 Effects on the Boundary Layer Caused by Inclusion of Dimples at Varying Depths
C12-161 Static and Forced-Oscillation Tests of a Generic Unmanned Combat Air Vehicle
C12-055 Leading-Edge Radius Effects on Aerodynamic Characteristics of 50-Degree Delta Wings
C12-150 Fast Unstructured-Mesh Finite-Element Method for Nonlinear Subsonic Flow
C12-030 High-Incidence Airfoil Lift and Drag Estimates

Supersonic Flow

C12-046 Exhaust Nozzle Plume Effects on Sonic Boom
C12-084 Adjoint-Based Aerodynamic Optimization of Supersonic Biplane Airfoils

Transonic Flow

C12-126 Experimental Study into the Flow Physics of Three-Dimensional Shock Control Bumps
C12-188 Interference Drag Modeling and Experiments for a High-Reynolds-Number Transonic Wing
C12-180 Reduced-Order Modeling of Transonic Flutter and Limit-Cycle Oscillations Using Sparse Volterra Series
C12-157 Drag Reduction for Sweptback Grid Fin with Blunt and Sharp Leading Edges
C12-123 How Structural Model Variability Influences Transonic Aeroelastic Stability
C12-112 Adjoint Optimization of a Wing Using the Class-Shape-Refinement-Transformation Method

Unsteady Flows

C12-120 Uncertainty Quantification of Two-Dimensional Wake Vortices Near the Ground
C12-042 Numerical Study of Propeller Slipstream Based on Unstructured Dynamic Overset Grids
C12-209 Numerical Investigation of a NACA 0012 Airfoil in Oscillatory Motions
C12-163 Stability and Control Analysis for an Unmanned Aircraft Configuration Using System-Identification Techniques

Vortices

C12-162 Stereoscopic Particle Image Velocimetry Flowfield Investigation of an Unmanned Combat Air Vehicle
C12-055 Leading-Edge Radius Effects on Aerodynamic Characteristics of 50-Degree Delta Wings
C12-189 Flow Control of a Slender Blunt-Nose Body at High Angles of Attack
C12-163 Stability and Control Analysis for an Unmanned Aircraft Configuration Using System-Identification Techniques

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

C12-122 Autorotational Spin Evolving Toward Chaos

C12-191 Aircraft Shortest and Fastest Continuous-Descent Approach Development

Aircraft Guidance

C12-061 Targeted Parameter Inflation within Ground-Based Augmentation Systems to Minimize Anomalous Ionospheric Impact

Aircraft Stability and Control

C12-078 Adaptive Statistical Approach To Flutter Detection
C12-161 Static and Forced-Oscillation Tests of a Generic Unmanned Combat Air Vehicle
C12-210 Modeling the Pilot Detection of Time-Varying Aircraft Dynamics
C12-185 Flight Test Maneuvers for Efficient Aerodynamic Modeling
C12-114 Modeling the Nonlinear Dynamic Roll of Generic Fighter Using Delayed Detached-Eddy Simulation
C12-110 Real-Time Aerodynamic Parameter Estimation Without Airflow Angle Measurements
C12-206 Frequency-Domain-Based Pseudosliding Mode Flight Control Design
C12-070 Investigation of Aerodynamic Parameters of a Hybrid Airship

Avionics Systems

C12-061 Targeted Parameter Inflation within Ground-Based Augmentation Systems to Minimize Anomalous Ionospheric Impact

Control System Design

C12-206 Frequency-Domain-Based Pseudosliding Mode Flight Control Design

Dynamics

C12-192 Multibody Analysis of the Terminal Phase for a Reentry Vehicle: A Comparative Study

Flight Mechanics

C12-185 Flight Test Maneuvers for Efficient Aerodynamic Modeling
C12-192 Multibody Analysis of the Terminal Phase for a Reentry Vehicle: A Comparative Study

Handling Qualities

C12-106 Ship-Helicopter Operating Limits Prediction Using Piloted Flight Simulation and Time-Accurate Airwakes
C12-130 Aerodynamic Loading Characteristics of a Model-Scale Helicopter in a Ship's Airwake
C12-206 Frequency-Domain-Based Pseudosliding Mode Flight Control Design

Launch Vehicle Dynamics

C12-169 Computational Aeroelastic Simulation of Rapidly Morphing Air Vehicles

Navigation

C12-061 Targeted Parameter Inflation within Ground-Based Augmentation Systems to Minimize Anomalous Ionospheric Impact

Optimization Techniques

C12-022 Sequential Dynamic Strategies for Real-Time Scheduling of Terminal Traffic
C12-064 Optimization of Flatback Airfoils for Wind-Turbine Blades Using a Genetic Algorithm
C12-191 Aircraft Shortest and Fastest Continuous-Descent Approach Development

Signal Processing

C12-003 Monitor of Remote Control Vehicle via Approximate Gabor Transform of Their Acoustic Signatures

Structural Control

C12-078 Adaptive Statistical Approach To Flutter Detection

System Identification

C12-033 Reliable Damage Prognosis for Structures Using the LSCR Approach
C12-110 Real-Time Aerodynamic Parameter Estimation Without Airflow Angle Measurements
C12-069 Identification of Aerodynamic Derivatives of a Flexible Aircraft

Trajectory Optimization

C12-149 Optimization of Unpowered Descents of Commercial Aircraft in Altitude-Dependent Winds
C12-037 Framework for Aircraft Trajectory Planning Toward an Efficient Air Traffic Management
C12-080 Evaluating Concepts for Operations in Metroplex Terminal Area Airspace

INTERDISCIPLINARY TOPICS

Aerospace Management

C12-104 Configuration of the Multibubble Pressure Cabin in Blended-Wing/Body
C12-027 Wake Vortex Encounter Risk Assessment for Crosswind Departures
C12-052 Game Theory Analysis of the Impact of Single-Aisle Aircraft Competition on Emissions

Analytical and Numerical Methods

C12-023 Nonprobabilistic Reliability Analysis for an Inside Flap of an Aircraft
C12-122 Autorotational Spin Evolving Toward Chaos
C12-169 Computational Aeroelastic Simulation of Rapidly Morphing Air Vehicles

Atmospheric and Space Sciences

C12-182 Mission Performance of the Tempest Unmanned Aircraft System in Supercell Storms

Environmental Effects

C12-190 Fuel Burn and CO_2 Systemwide Assessment of Environmentally Responsible Aviation Technologies
C12-052 Game Theory Analysis of the Impact of Single-Aisle Aircraft Competition on Emissions
C12-027 Wake Vortex Encounter Risk Assessment for Crosswind Departures
C12-140 Tradeoff Between Contrail Reduction and Emissions in United States National Airspace

Human Factors

C12-141 Assisting Air Traffic Controllers in Planning and Monitoring Continuous-Descent Approaches
C12-002 Human in the Loop: Predicted Likelihood of Vehicular Mission Success and Safety
C12-118 Pilot Performance in Centrifuge-Based Simulation of Unusual Attitude Recovery
C12-177 Development and Evaluation of an Automated Path Planning Aid

Multidisciplinary Design Optimization

C12-074 Application of Value-Driven Design to Commercial Aeroengine Systems
C12-129 Multifidelity, Multistrategy, and Multidisciplinary Design Optimization Environment
C12-082 Multistate Design Approach to Analysis of Twin-Engine Aircraft Performance Robustness
C12-001 Realization of Morphing Wings: A Multidisciplinary Challenge
C12-197 Optimizing Families of Reconfigurable Aircraft for Multiple Missions
C12-178 Concurrent Optimization of Mesh Refinement and Design Parameters in Multidisciplinary Design
C12-156 Integrated Aerodynamic Thermal Structure Design Optimization Method of Lifting Surfaces
C12-184 Multidisciplinary Design Optimization of Medium-Range Transonic Truss-Braced Wing Transport Aircraft
C12-103 Morphing Airfoil Design for Minimum Drag and Actuation Energy Including Aerodynamic Work
C12-117 Multi-Objective Optimization for the Multiphase Design of Active Polymorphing Wings
C12-048 Aeroservoelastic Design Optimization of a Flexible Wing
C12-105 Design of a Morphing Airfoil with Composite Chiral Structure
C12-004 Vibro-Acoustic Optimization of Turbulent Boundary-Layer Excited Panel with Curvilinear Stiffeners
C12-025 Optimum Transverse Span Loading for Subsonic Transport Category Aircraft
C12-040 Framework for Aircraft Cost Optimization Using Multidisciplinary Analysis C12-066 Design and Optimization of Tidal Turbine Airfoil
C12-013 Allocation and Design of Aircraft for On-Demand Air Transportation with Uncertain Operations
C12-124 Design-Informatics Approach for Intimate Configuration of Silent Supersonic Technology Demonstrator

Reliability, Maintainability, and Logistics Support

C12-082 Multistate Design Approach to Analysis of Twin-Engine Aircraft Performance Robustness
C12-068 CF6 Engine Operational Reliability and Maintenance Optimization
C12-033 Reliable Damage Prognosis for Structures Using the LSCR Approach
C12-072 New Linear Programming-Based Bound Method for Structural System Reliability

Research Facilities and Instrumentation

C12-058 Wind-Tunnel Force Balance Characterization for Hypersonic Research Applications
C12-049 Method for the Measurement of the Inertia Properties of Bodies with Aerofoils

Safety

C12-068 CF6 Engine Operational Reliability and Maintenance Optimization
C12-002 Human in the Loop: Predicted Likelihood of Vehicular Mission Success and Safety
C12-027 Wake Vortex Encounter Risk Assessment for Crosswind Departures
Sensor Systems

C12-049 Method for the Measurement of the Inertia Properties of Bodies with Aerofoils
C12-058 Wind-Tunnel Force Balance Characterization for Hypersonic Research Applications

LAUNCH VEHICLE AND MISSILE TECHNOLOGY

Aerodynamics

C12-154 Triform Wing/Body Loading

Configuration Design

C12-124 Design-Informatics Approach for Intimate Configuration of Silent Supersonic Technology Demonstrator
C12-013 Allocation and Design of Aircraft for On-Demand Air Transportation with Uncertain Operations

Propulsion and Propellant Systems

C12-042 Numerical Study of Propeller Slipstream Based on Unstructured Dynamic Overset Grids

Subsystem Design and Ground Support

C12-086 Statistical Determination of Vertical Resolution Requirements for Real-Time Wake-Vortex Prediction

Testing: Flight and Ground

C12-086 Statistical Determination of Vertical Resolution Requirements for Real-Time Wake-Vortex Prediction

PROPULSION

Emissions and Noises

C12-190 Fuel Burn and CO_2 Systemwide Assessment of Environmentally Responsible Aviation Technologies

REAL-TIME SYSTEMS

Robotic Systems

C12-167 Unmanned Air Systems: Challenge and Opportunity Signal Processing
C12-003 Monitor of Remote Control Vehicle via Approximate Gabor Transform of Their Acoustic Signatures
C12-078 Adaptive Statistical Approach To Flutter Detection

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Control

C12-181 Tiltrotor Wing-Root Vibratory Loads Reduction Through Higher Harmonic Control Actuation
C12-093 Aeroelastic Model of Multisegmented Folding Wings: Theory and Experiment
C12-169 Computational Aeroelastic Simulation of Rapidly Morphing Air Vehicles
C12-180 Reduced-Order Modeling of Transonic Flutter and Limit-Cycle Oscillations Using Sparse Volterra Series
C12-168 Effectiveness of Wing Twist Morphing in Roll Control
C12-121 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Time Domain
C12-111 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Frequency Domain
C12-029 Structural and Aeroelastic Characteristics of Truss-Braced Wings: A Parametric Study
C12-048 Aeroservoelastic Design Optimization of a Flexible Wing
C12-102 Adaptive Reduced-Order-Model-Based Control-Law Design for Active Flutter Suppression

Dynamic Model Analysis

C12-125 Hydromechanical Analysis of a Fluid–Elastomeric Lag Damper Incorporating Temperature Effects
C12-116 Free Vibrations of Composite Base Plates Stiffened by Two Adhesively Bonded Plate Strips
C12-119 Modal Analysis of the Aircraft Hydraulic-System Pipeline

Flexible and Active Structures

C12-001 Realization of Morphing Wings: A Multidisciplinary Challenge
C12-105 Design of a Morphing Airfoil with Composite Chiral Structure
C12-103 Morphing Airfoil Design for Minimum Drag and Actuation Energy Including Aerodynamic Work
C12-134 Experimental Study of an Extremely Flexible Rotor for Microhelicopters
C12-011 Discretization Method for the Development of a Modular Morphing Wing
C12-034 Experimental Nonlinear Static Deflections of a Subscale Joined Wing
C12-043 Experimental Estimation of the Rotary Damping Coefficients of a Pliant Wing

Materials Structural Properties

C12-039 Effect of Dents on Crack Growth in Aluminum Alloy Under Constant-Amplitude Loading

Structural Composite Materials

C12-200 Deformation Analysis of Composite Rotor Blades for a Helicopter
C12-067 Vibration Characteristics of the Wings of Micro Air Vehicles
C12-105 Design of a Morphing Airfoil with Composite Chiral Structure
C12-116 Free Vibrations of Composite Base Plates Stiffened by Two Adhesively Bonded Plate Strips
C12-028 Multifunctional Unmanned Aerial Vehicle Wing Spar for Low-Power Generation and Storage
C12-054 Adhesive-Bonded Composite Joints Analysis with Delaminated Surface Ply Using Strain-Energy Release Rate
C12-065 Numerical Analysis of Fastener Delamination/Disbond Arrest Mechanism in Aircraft Composite Structures

Structural Design

C12-096 Thermal Stress Concentration in Plates from Different Materials
C12-001 Realization of Morphing Wings: A Multidisciplinary Challenge
C12-011 Discretization Method for the Development of a Modular Morphing Wing
C12-077 Structural Topology Optimization of a Pylon's Mount Using Ant Colony Algorithms
C12-054 Adhesive-Bonded Composite Joints Analysis with Delaminated Surface Ply Using Strain-Energy Release Rate

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

C12-005 Physics of Interaction of Lightning Currents with Aluminum Sheets
C12-143 Review of the F-16 Individual Aircraft Tracking Program
C12-033 Reliable Damage Prognosis for Structures Using the LSCR Approach
C12-065 Numerical Analysis of Fastener Delamination/Disbond Arrest Mechanism in Aircraft Composite Structures
C12-194 Using a Simple Crack Growth Model in Predicting Remaining Useful Life

Structural Dynamics and Characterization

C12-021 Structural Optimization of a Nose Landing Gear Considering Its Fatigue Life
C12-089 Verification of the Variational-Asymptotic Sectional Analysis for Initially Curved and Twisted Beams
C12-090 Stochastic Modeling of Structural Uncertainty/Variability from Ground Vibration Modal Test Data
C12-123 How Structural Model Variability Influences Transonic Aeroelastic Stability
C12-121 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Time Domain
C12-119 Modal Analysis of the Aircraft Hydraulic-System Pipeline

Structural Finite Elements

C12-195 Modeling Method for Deformation Analysis in Thick Laminate Mechanical Joints
C12-089 Verification of the Variational-Asymptotic Sectional Analysis for Initially Curved and Twisted Beams
C12-111 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Frequency Domain
C12-045 Aeroelastic Analysis of Aircraft Wind-Tunnel Model Coupling Structural and Fluid Dynamic Codes
C12-155 Study of Bird Strikes Using Smooth Particle Hydrodynamics and Stochastic Parametric Evaluation

Structural Modeling

C12-096 Thermal Stress Concentration in Plates from Different Materials
C12-089 Verification of the Variational-Asymptotic Sectional Analysis for Initially Curved and Twisted Beams
C12-168 Effectiveness of Wing Twist Morphing in Roll Control

C12-195 Modeling Method for Deformation Analysis in Thick Laminate Mechanical Joints
C12-028 Multifunctional Unmanned Aerial Vehicle Wing Spar for Low-Power Generation and Storage
C12-054 Adhesive-Bonded Composite Joints Analysis with Delaminated Surface Ply Using Strain-Energy Release Rate
C12-155 Study of Bird Strikes Using Smooth Particle Hydrodynamics and Stochastic Parametric Evaluation

Structural Optimization

C12-156 Integrated Aerodynamic Thermal Structure Design Optimization Method of Lifting Surfaces
C12-021 Structural Optimization of a Nose Landing Gear Considering Its Fatigue Life
C12-155 Study of Bird Strikes Using Smooth Particle Hydrodynamics and Stochastic Parametric Evaluation
C12-077 Structural Topology Optimization of a Pylon's Mount Using Ant Colony Algorithms
C12-129 Multifidelity, Multistrategy, and Multidisciplinary Design Optimization Environment

Thermal Effects

C12-096 Thermal Stress Concentration in Plates from Different Materials
C12-005 Physics of Interaction of Lightning Currents with Aluminum Sheets
C12-121 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Time Domain
C12-111 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Frequency Domain

THERMOPHYSICS AND HEAT TRANSFER

Chronological Index

C12-001 Realization of Morphing Wings: A Multidisciplinary Challenge. Srinivas Vasista, Liyong Tong, and K. C. Wong, *University of Sydney*, Australia (**49**, 1, p. 11) Survey Paper

C12-002 Human in the Loop: Predicted Likelihood of Vehicular Mission Success and Safety. E. Suhir, *University of California, Santa Cruz* (**49**, 1, p. 29) Article

C12-003 Monitor of Remote Control Vehicle via Approximate Gabor Transform of Their Acoustic Signatures. Yih-Nen Jeng and Tzung-Ming Yang, *National Cheng-Kung University*, Taiwan (ROC) (**49**, 1, p. 37) Article

C12-004 Vibro-Acoustic Optimization of Turbulent Boundary-Layer Excited Panel with Curvilinear Stiffeners. Pankaj Joshi, Sameer B. Mulani, Wesley C. Slemp, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**49**, 1, p. 52) Article

C12-005 Physics of Interaction of Lightning Currents with Aluminum Sheets. Y. Kostogorova-Beller, *Wichita State University* (**49**, 1, p. 66) Article

C12-006 Experimental Study of Half-Delta Wing Vortex Generator for Flow Separation Control. A. R. Serakawi and K. A. Ahmad, *Universiti Sains Malaysia*, Malaysia (**49**, 1, p. 76) Article

C12-007 Mesh Deformation Method for Rotor Flows. F. Dehaeze and G. N. Barakos, *University of Liverpool*, Great Britain (**49**, 1, p. 82) Article

C12-008 Multistage-Fusion Algorithm for Estimation of Aerodynamic Angles in Mini Aerial Vehicle. C. Ramprasadh and Hemendra Arya, *Indian Institute of Technology Bombay*, India (**49**, 1, p. 93) Article

C12-009 Inboard Stall Delay due to Rotation. Horia Dumitrescu and Vladimir Cardos, *Institute of Statistical Mathematics and Applied Mathematics*, Romania (**49**, 1, p. 101) Article

C12-010 Dynamic Roughness as a Means of Leading-Edge Separation Flow Control. W. W. Huebsch, P. D. Gall, and S. D. Hamburg, *West Virginia University*; and A. P. Rothmayer, *Iowa State University* (**49**, 1, p. 108) Article

C12-011 Discretization Method for the Development of a Modular Morphing Wing. Allan D. Finistauri, Fengfeng (Jeff) Xi, and Paul Walsh, *Ryerson University*, Canada (**49**, 1, p. 116) Article

C12-012 Nondimensional Modeling of Ducted-Fan Aerodynamics. Osgar J. Ohanian and Paul A. Gelhausen, *AVID LLC*; and Daniel J. Inman, *University of Michigan* (**49**, 1, p. 126) Article

C12-013 Allocation and Design of Aircraft for On-Demand Air Transportation with Uncertain Operations. Muharram Mane and William A. Crossley, *Purdue University* (**49**, 1, p. 141) Article

C12-014 Investigation of the Drag Characteristics of Stratosphere Airships for Different Cusp Shapes. Xiao-liang Wang, *Shanghai Jiao Tong University*, China (PRC) (**49**, 1, p. 151) Article

C12-015 Drag Reduction Methodology for Adaptive Tailless Aircraft. Aaron A. Cusher and Ashok Gopalarathnam, *North Carolina State University* (**49**, 1, p. 161) Article

C12-016 Form Factor and Critical Mach Number Estimation for Finite Wings. Timothy J. Takahashi, *Santa Clara University*; Brian J. German, *Georgia Institute of Technology*; Arvin Shajanian, *Northrop Grumman Aerospace Systems*; Matthew J. Daskilewicz, *Georgia Institute of Technology*; and Shane Donovan, *Northrop Grumman Aerospace Systems* (**49**, 1, p. 173) Article

C12-017 Experimental Investigation of a Morphable Biplane. Lance W. Traub and Thomas Nix, *Embry-Riddle Aeronautical University* (**49**, 1, p. 183) Article

C12-018 Performance, Flight Testing of Shrouded Rotor Micro Air Vehicle in Edgewise Gusts. Vikram Hrishikeshavan and Inderjit Chopra, *University of Maryland* (**49**, 1, p. 193) Article

C12-019 Detailed Observations of Interactions of Wingtip Vortices in Close-Formation Flight. Ayumu Inasawa, Fumihide Mori, and Masahito Asai, *Tokyo Metropolitan University*, Japan (**49**, 1, p. 206) Article

C12-020 En Route Speed Reduction Concept for Absorbing Air Traffic Flow Management Delays. Luis Delgado and Xavier Prats, *Technical University of Catalonia*, Spain (**49**, 1, p. 214) Article

C12-021 Structural Optimization of a Nose Landing Gear Considering Its Fatigue Life. C. J. Xue, J. H. Dai, T. Wei, and B. Liu, *Nanjing University of Aeronautics and Astronautics*, China (PRC); Y. Q. Deng, *Zhuhai China Aviation Industry General Aviation Company, Ltd.*, China (PRC); and J. Ma, *Commercial Aircraft Corporation of China*, China (PRC) (**49**, 1, p. 225) Article

C12-022 Sequential Dynamic Strategies for Real-Time Scheduling of Terminal Traffic. Heming Chen and Yiyuan J. Zhao, *University of Minnesota* (**49**, 1, p. 237) Article

C12-023 Nonprobabilistic Reliability Analysis for an Inside Flap of an Aircraft. Zhangzhun Tang, Zhenzhou Lu, Dawei Li, and Zhang Feng, *Northwestern Polytechnical University*, China (PRC) (**49**, 1, p. 250) Article

C12-024 Penalties of Nonoptimal Turnback Maneuvers. David F. Rogers, *U.S. Naval Academy* (**49**, 1, p. 257) Article

C12-025 Optimum Transverse Span Loading for Subsonic Transport Category Aircraft. Timothy T. Takahashi, *Santa Clara University* (**49**, 1, p. 262) Article

C12-026 Methods for Analyzing Nose Gear During Landing Using Structural Finite Element Analysis. Thoai Nguyen, Alexandra Schonning, and Paul Eason, *University of North Florida*; and David Nicholson, *University of Central Florida* (**49**, 1, p. 275) Article

C12-027 Wake Vortex Encounter Risk Assessment for Crosswind Departures. Sebastian Kauertz, *Airbus Operations S.A.S.*, France; and Frank Holzäpfel and Jan Kladetzke, *DLR, German Aerospace Research Center*, Germany (**49**, 1, p. 281) Article

C12-028 Multifunctional Unmanned Aerial Vehicle Wing Spar for Low-Power Generation and Storage. Steven R. Anton, *Los Alamos National Laboratory*; Alper Erturk, *Georgia Institute of Technology*; and Daniel J. Inman, *University of Michigan* (**49**, 1, p. 292) Article

C12-029 Structural and Aeroelastic Characteristics of Truss-Braced Wings: A Parametric Study. Manav Bhatia and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; and Raphael T. Haftka, *University of Florida* (**49**, 1, p. 302) Article

C12-030 High-Incidence Airfoil Lift and Drag Estimates. Lance W. Traub, *Embry-Riddle Aeronautical University* (**49**, 1, p. 311) Technical Note

C12-031 Nonlinear Modeling of Cascade Fin Aerodynamics Using Kirchhoff's Steady-State Stall Model. Rakesh Kumar, Ajay Mishra, and A. K. Ghosh, *Indian Institute of Technology*, India (**49**, 1, p. 315) Technical Note

C12-032 Method for Assessing Unmanned Aerial Vehicle Vulnerability to High-Energy Laser Weapon. Yang Pei and Bifeng Song, *Northwestern Polytechnical University*, China (PRC) (**49**, 1, p. 319) Technical Note

C12-033 Reliable Damage Prognosis for Structures Using the LSCR Approach. Sangho Ko, Joo H. Choi, and Sangchul Lee, *Korea Aerospace University*, South Korea (ROK) (**49**, 1, p. 323) Technical Note

C12-034 Experimental Nonlinear Static Deflections of a Subscale Joined Wing. Vanessa L. Bond, *Air Force Operational Test and Evaluation Center*; Robert A. Canfield, *Virginia Polytechnic Institute and State University*; Jonathan E. Cooper, *University of Liverpool*, Great Britain; and Maxwell Blair, *U.S. Air Force Research Laboratory* (**49**, 1, p. 329) Technical Note

C12-035 Supersonic Flutter Analysis of Vehicles at Incidence Based on Local Piston Theory. Xiaoming Shi and Guoan Tang, *Fudan University*, China (PRC); and Bingyuan Yang and Haidong Li, *Shanghai Academy of Spaceflight Technology*, China (PRC) (**49**, 1, p. 333) Technical Note

C12-036 Kronecker Product Method for the Exact Solution of Aircraft Vulnerability. Yang Pei, Pan L., and Bifeng Song, *Northwestern Polytechnical University*, China (PRC) (**49**, 1, p. 337) Technical Note

C12-037 Framework for Aircraft Trajectory Planning Toward an Efficient Air Traffic Management. M. Soler, A. Olivares, and E. Staffetti, *Rey Juan Carlos University*, Spain; and D. Zapata, *Airbus Military*, Spain (**49**, 1, p. 341) Technical Note

C12-038 Low-Cost High-Altitude Low-Opening Cargo Airdrop Systems. Kenneth J. Desabrais, Justin Riley, James Sadeck, and Calvin Lee, *U.S. Army Natick Research, Development, and Engineering Center* (**49**, 1, p. 349) Technical Note

C12-039 Effect of Dents on Crack Growth in Aluminum Alloy Under Constant-Amplitude Loading. Bert L. Smith and Praveen Shivally, *Wichita State University*; and Brijesh Kumar, *Boeing Integrated Defense Systems* (**49**, 2, p. 357) Article

C12-040 Framework for Aircraft Cost Optimization Using Multidisciplinary Analysis. Praveen Thokala, Jim Scanlan, and Andy Chipperfield, *University of Southampton*, Great Britain (**49**, 2, p. 367) Article

C12-041 Multi-Objective Optimization of Helicopter Airfoils Using Surrogate-Assisted Memetic Algorithms. Andrea Massaro and Ernesto Benini, *University of Padova*, Italy (**49**, 2, p. 375) Article

C12-042 Numerical Study of Propeller Slipstream Based on Unstructured Dynamic Overset Grids. He-yong Xu, Zheng-yin Ye, and Ai-ming Shi, *Northwestern Polytechnical University*, China (PRC) (**49**, 2, p. 384) Article

C12-043 Experimental Estimation of the Rotary Damping Coefficients of a Pliant Wing. Judson Babcock, *U.S. Air Force Research Laboratory*; Roberto Albertani, *University of Florida*; and Gregg Abate, *U.S. Air Force Research Laboratory* (**49**, 2, p. 390) Article

C12-044 Correlation of Aeroelastic Response and Structural Loads for a Rotor in Descent. Sung N. Jung, Young H. You, Jee W. Kim, Jeong H. Sa, Jae S. Park, and Soo H. Park, *Konkuk University*, South Korea (ROK) (**49**, 2, p. 398) Article

C12-045 Aeroelastic Analysis of Aircraft Wind-Tunnel Model Coupling Structural and Fluid Dynamic Codes. Ubaldo Cella, *Piaggio Aero Industries*, Italy; and Marco E. Biancolini, *University of Rome "Tor Vergata"*, Italy (**49**, 2, p. 407) Article

C12-046 Exhaust Nozzle Plume Effects on Sonic Boom. Raymond Castner, *NASA John H. Glenn Research Center at Lewis Field* (**49**, 2, p. 415) Article

C12-047 Wing Stiffness on Light Flapping Micro Aerial Vehicles. Lung-Jieh Yang, A-Fu Ko, and Cheng-Kuei Hsu, *Tamkang University*, Taiwan (ROC) (**49**, 2, p. 423) Article

C12-048 Aeroservoelastic Design Optimization of a Flexible Wing. Sohrab Haghighat, *University of Toronto*, Canada; Joaquim R. Martins, *University of Michigan*; and Hugh H. Liu, *University of Toronto*, Canada (**49**, 2, p. 432) Article

C12-049 Method for the Measurement of the Inertia Properties of Bodies with Aerofoils. G. Previati, M. Gobbi, and G. Mastinu, *Politecnico di Milano*, Italy (**49**, 2, p. 444) Article

C12-050 Longitudinal Aerodynamics of Rapidly Pitching Fixed-Wing Micro Air Vehicles. Ryan Randall and Sergey Shkarayev, *University of Arizona*; and Gregg Abate and Judson Babcock, *U.S. Air Force Research Laboratory* (**49**, 2, p. 453) Article

C12-051 Positioning Algorithm for Autonomous Thermal Soaring. Naseem Akhtar, Alastair K. Cooke, and James F. Whidborne, *Cranfield University*, Great Britain (**49**, 2, p. 472) Article

C12-052 Game Theory Analysis of the Impact of Single-Aisle Aircraft Competition on Emissions. James K. Morrison and R. J. Hansman, *Massachusetts Institute of Technology*; and Sgouris Sgouridis, *Masdar Institute of Science and Technology*, United Arab Emirates (**49**, 2, p. 483) Article

C12-053 Multiblade Reduced-Order Aerodynamics for State-Space Aeroelastic Modeling of Rotors. Massimo Gennaretti and Daniel Muro, *University Roma Tre*, Italy (**49**, 2, p. 495) Article

C12-054 Adhesive-Bonded Composite Joints Analysis with Delaminated Surface Ply Using Strain-Energy Release Rate. Alireza Chadegani and Chihdar Yang, *Wichita State University*; and Stanley S. Smeltzer, *NASA Langley Research Center* (**49**, 2, p. 503) Article

C12-055 Leading-Edge Radius Effects on Aerodynamic Characteristics of 50-Degree Delta Wings. N. G. Verhaagen, *Delft University of Technology*, The Netherlands (**49**, 2, p. 521) Article

C12-056 Numerical Investigations on Flow Control over Blended-Wing/Body Transonic Aircraft Using Synthetic-Jet Actuators. Ashish S. Sharma, Vikram S. Rawat, Vinayak Kulkarni, and Ujjwal K. Saha, *Indian Institute of Technology*, India (**49**, 2, p. 532) Article

C12-057 Evaluation of Multibody Parafoil Dynamics Using Distributed Miniature Wireless Sensors. Chrystine M. Gorman and Nathan Slegers, *University of Alabama in Huntsville* (**49**, 2, p. 546) Article

C12-058 Wind-Tunnel Force Balance Characterization for Hypersonic Research Applications. Keith C. Lynn, Sean A. Commo, and Peter A. Parker, *NASA Langley Research Center* (**49**, 2, p. 556) Article

C12-059 Effect of the Transient Nature of Flow on Annular Parachute Drag Prediction. Mark McQuilling and Jean Potvin, *Saint Louis University* (**49**, 2, p. 566) Article

C12-060 Experimental and Theoretical Investigation of Ground Effect at Low Reynolds Numbers. Justin Gross and Lance W. Traub, *Embry-Riddle Aeronautical University* (**49**, 2, p. 576) Article

C12-061 Targeted Parameter Inflation within Ground-Based Augmentation Systems to Minimize Anomalous Ionospheric Impact. Jiwon Seo, *Yonsei University*, South Korea (ROK); Jiyun Lee, *Korea Advanced Institute of Science and Technology*, South Korea (ROK); and Sam Pullen, Per Enge, and Sigrid Close, *Stanford University* (**49**, 2, p. 587) Article

C12-062 Simulation of Supercooled Large Droplet Impingement via Reduced-Order Technology. Marco Fossati and Wagdi G. Habashi, *McGill University*, Canada; and Guido S. Baruzzi, *Newmerical Technologies International*, Canada (**49**, 2, p. 600) Article

C12-063 In-Flight Icing Risk Management Through Computational Fluid Dynamics-Icing Analysis. Danial Zeppetelli and Wagdi G. Habashi, *McGill University*, Canada (**49**, 2, p. 611) Article

C12-064 Optimization of Flatback Airfoils for Wind-Turbine Blades Using a Genetic Algorithm. Xiaomin Chen and Ramesh Agarwal, *Washington University in St. Louis* (**49**, 2, p. 622) Article

C12-065 Numerical Analysis of Fastener Delamination/Disbond Arrest Mechanism in Aircraft Composite Structures. Chi H. Cheung and Kuen Y. Lin, *University of Washington* (**49**, 2, p. 630) Article

C12-066 Design and Optimization of Tidal Turbine Airfoil. F. Grasso, *Energy Research Centre of the Netherlands*, The Netherlands (**49**, 2, p. 636) Article

C12-067 Vibration Characteristics of the Wings of Micro Air Vehicles. Uttam K. Chakravarty, *U.S. Air Force Research Laboratory* (**49**, 2, p. 644) Article

C12-068 CF6 Engine Operational Reliability and Maintenance Optimization. Charoenrat Petcharin and He Ren, *RMIT University*, Australia (**49**, 2, p. 651) Technical Note

C12-069 Identification of Aerodynamic Derivatives of a Flexible Aircraft. Majeed M and Jatinder Singh, *Council of Scientific and Industrial Research*, India; and Indra N. Kar, *Indian Institute of Technology*, India (**49**, 2, p. 654) Technical Note

C12-070 Investigation of Aerodynamic Parameters of a Hybrid Airship. Amelda D. Andan, Waqar Asrar, and Ashraf A. Omar, *International Islamic University Malaysia*, Malaysia (**49**, 2, p. 658) Technical Note

C12-071 Aeroelasticity of a Helicopter Blade Using the Euler Equations. Guru P. Guruswamy, *NASA Ames Research Center* (**49**, 2, p. 662) Technical Note

C12-072 New Linear Programming-Based Bound Method for Structural System Reliability. Pengfei Wei, Zhenzhou Lu, and Longfei Tian, *Northwestern Polytechnical University*, China (PRC) (**49**, 2, p. 664) Technical Note

C12-073 Requirements, Issues, and Challenges for Sense and Avoid in Unmanned Aircraft Systems. Xavier Prats, Luis Delgado, Jorge Ramírez, Pablo Royo, and Enric Pastor, *Technical University of Catalonia*, Spain (**49**, 3, p. 677) Survey Paper

C12-074 Application of Value-Driven Design to Commercial Aeroengine Systems. Julie Cheung, James Scanlan, James Wong, Jennifer Forrester, and Hakki Eres, *University of Southampton*, Great Britain; Paul Collopy, *University of Alabama*; Peter Hollingsworth, *University of Manchester*, Great Britain; Steve Wiseall, *Rolls–Royce plc*, Great Britain; and Simon Briceno, *Georgia Institute of Technology* (**49**, 3, p. 688) Article

C12-075 Model for Estimating Unsteady Force Derivatives. Nicola De Divitiis, *University of Rome "La Sapienza"*, Italy (**49**, 3, p. 703) Article

C12-076 Whole Life Costing for Capability. J. M. Early and M. A. Price, *Queens University*, Great Britain; R. Curran, *Delft University of Technology*, The Netherlands; and R. Raghunathan, *Queens University*, Great Britain (**49**, 3, p. 712) Article

C12-077 Structural Topology Optimization of a Pylon's Mount Using Ant Colony Algorithms. Cai-Jun Xue, Fen-Jin Xu, Yuan Xu, and Wei Tan, *Nanjing University of Aeronautics and Astronautics*, China (PRC) (**49**, 3, p. 724) Article

C12-078 Adaptive Statistical Approach To Flutter Detection. R. Zouari and L. Mevel, *Institut de Recherche en Informatique et Automatique*, France; and M. Basseville, *Institut de Recherche en Informatique et Systèmes Aléatoires*, France (**49**, 3, p. 735) Article

C12-079 Numerical Investigation of the Aerodynamic and Structural Characteristics of a Corrugated Airfoil. Kyle Hord and Yongsheng Liang, *University of Louisville* (**49**, 3, p. 749) Article

C12-080 Evaluating Concepts for Operations in Metroplex Terminal Area Airspace. John-Paul Clarke, Liling Ren, and Evan McClain, *Georgia Institute of Technology*; David Schleicher, Sebastian Timar, and Aditya Saraf, *Sensis Corporation*; Donald Crisp, Richard Gutterud, and Ryan Laroza, *ATAC Corporation*; and Terence Thompson, Carolyn Cross, and Taryn Lewis, *Metron Aviation, Inc.* (**49**, 3, p. 758) Article

C12-081 Framework for Aeroservoelastic Analyses Involving Nonlinear Actuators. Nagaraj K. Banavara, *Gulfstream Aerospace Corporation*; and Jerry R. Newsom, *Newsom Aerospace Consulting, LLC* (**49**, 3, p. 774) Article

C12-082 Multistate Design Approach to Analysis of Twin-Engine Aircraft Performance Robustness. Jeremy S. Agte and Nicholas K. Borer, *Charles Stark Draper Laboratory, Inc.*; and Olivier de Weck, *Massachusetts Institute of Technology* (**49**, 3, p. 781) Article

C12-083 Composite Control of Stratospheric Airships with Moving Masses. L. Chen, G. Zhou, X. J. Yan, and D. P. Duan, *Shanghai Jiao Tong University*, China (PRC) (**49**, 3, p. 794) Article

C12-084 Adjoint-Based Aerodynamic Optimization of Supersonic Biplane Airfoils. Rui Hu, *Massachusetts Institute of Technology*; Antony Jameson, *Stanford University*; and Qiqi Wang, *Massachusetts Institute of Technology* (**49**, 3, p. 802) Article

C12-085 Comparison Study of Membrane Dehumidification Aircraft Environmental Control Systems. Weixing Yuan, *Beijing University of Aeronautics and Astronautics*, China (PRC); Yunxiang Li, *Northwestern Polytechnical University*, China (PRC); and Chenjie Wang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**49**, 3, p. 815) Article

C12-086 Statistical Determination of Vertical Resolution Requirements for Real-Time Wake-Vortex Prediction. Karen M. Feigh, Lakshmi Sankar, and Vasudevan Manivannan, *Georgia Institute of Technology* (**49**, 3, p. 822) Article

C12-087 Effect of Aspect Ratio on Flow Through Serpentine Nozzles. T. Reynolds and M. F. Reeder, *Air Force Institute of Technology* (**49**, 3, p. 836) Article

C12-088 Computational Study of a High-Performance Submerged Inlet with Bleeding Vortex. Dai-shu Cheng, Hui-jun Tan, Shu Sun, and Yue Tong, *Nanjing University of Aeronautics and Astronautics*, China (PRC) (**49**, 3, p. 852) Article

C12-089 Verification of the Variational-Asymptotic Sectional Analysis for Initially Curved and Twisted Beams. Ravi K. Kovvali and Dewey H. Hodges, *Georgia Institute of Technology* (**49**, 3, p. 861) Article

C12-090 Stochastic Modeling of Structural Uncertainty/Variability from Ground Vibration Modal Test Data. Javier Avalos, *Arizona State University*; Eric D. Swenson, *Air Force Institute of Technology*; Marc P. Mignolet, *Arizona State University*; and Ned J. Lindsley, *U.S. Air Force Research Laboratory* (**49**, 3, p. 870) Article

C12-091 Experimental and Computational Assessment of a Ducted-Fan Rotor Flow Model. Ali Akturk and Cengiz Camci, *Pennsylvania State University* (**49**, 3, p. 885) Article

C12-092 Steady Aerodynamics of Miniature Trailing-Edge Devices in Transonic Flows. K. Richter and H. Rosemann, *DLR, German Aerospace Center*, Germany (**49**, 3, p. 898) Article

C12-093 Aeroelastic Model of Multisegmented Folding Wings: Theory and Experiment. Ivan Wang, S. Chad Gibbs, and Earl H. Dowell, *Duke University* (**49**, 3, p. 911) Article

C12-094 Linearized Euler Solver for Rapid Frequency-Domain Aeroelastic Analysis. Z. Zhang, S. Yang, and P. C. Chen, *ZONA Technology* (**49**, 3, p. 922) Article

C12-095 Computational Fluid Dynamics Predictions of Stability Derivatives for Airship. Xiao-liang Wang, *Shanghai Jiao Tong University*, China (PRC) (**49**, 3, p. 933) Article

C12-096 Thermal Stress Concentration in Plates from Different Materials. Z. Abdulaliyev, M. Bakioglu, and S. Ataoglu, *Istanbul Technical University*, Turkey; and Z. Kurtkaya and A. N. Gulluoglu, *Marmara University*, Turkey (**49**, 3, p. 941) Article

C12-097 Trial Input Method and Own-Aircraft State Prediction in Autonomous Air Combat. Yigun Dong and Jianliang Ai, *Fudan University*, China (PRC) (**49**, 3, p. 947) Design Forum

C12-098 Computational Fluid Dynamics Analysis of an Optimized Load-Distribution Propeller. Jurij Sodja, *University of Ljubljana*, Slovenia; Domen Stadler, *Turboinstitut*, Slovenia; and Tadej Kosel, *University of Ljubljana*, Slovenia (**49**, 3, p. 955) Technical Note

C12-099 Unsteady Reynolds-Averaged Navier–Stokes-Based Hybrid Methodologies for Rotor–Fuselage Interaction. Eliot W. Quon and Marilyn J. Smith, *Georgia Institute of Technology*; and Glen R. Whitehouse and Dan Wachspress, *Continuum Dynamics, Inc.* (**49**, 3, p. 961) Technical Note

C12-100 ZONA6 Versus the Doublet-Lattice Method for Unsteady Aerodynamics on Lifting Surfaces. P. C. Chen and Samarth Bhasin, *ZONA Technology, Inc.* (**49**, 3, p. 966) Technical Note

C12-101 Effects on the Boundary Layer Caused by Inclusion of Dimples at Varying Depths. Erik C. Miller, *St. Norbert College* (**49**, 4, p. 969) Article

C12-102 Adaptive Reduced-Order-Model-Based Control-Law Design for Active Flutter Suppression. Gang Chen, Jian Sun, and Yue-ming Li, *Xi'an Jiaotong University*, China (PRC) (**49**, 4, p. 973) Article

C12-103 Morphing Airfoil Design for Minimum Drag and Actuation Energy Including Aerodynamic Work. Howoong Namgoong, William A. Crossley, and Anastasios S. Lyrintzis, *Purdue University* (**49**, 4, p. 981) Article

C12-104 Configuration of the Multibubble Pressure Cabin in Blended-Wing/Body Aircraft. Z. van der Voet, F. J. Geuskens, T. J. Ahmed, B. Ninaber van Eyben, and A. Beukers, *Delft University of Technology*, The Netherlands (**49**, 4, p. 991) Article

C12-105 Design of a Morphing Airfoil with Composite Chiral Structure. Alessandro Airoldi, Marco Crespi, Giuseppe Quaranti, and Giuseppe Sala, *Politecnico di Milano*, Italy (**49**, 4, p. 1008) Article

C12-106 Ship-Helicopter Operating Limits Prediction Using Piloted Flight Simulation and Time-Accurate Airwakes. James S. Forrest, *Prism Defence Pty., Ltd.*, Great Britain; Ieuan Owen, *University of Lincoln*, Great Britain; Gareth D. Padfield, *University of Liverpool*, Great Britain; and Steven J. Hodge, *BAE Systems*, Great Britain (**49**, 4, p. 1020) Article

C12-107 Preliminary Study on a Wide-Speed-Range Helicopter Rotor/Turboshaft System. Andrea Garavello and Ernesto Benini, *University of Padua*, Italy (**49**, 4, p. 1032) Article

C12-108 Evaluation and Characterization of a Lateral Synthetic Jet Actuator. Lance W. Traub, Michael Sweet, and Karl Nilssen, *Embry-Riddle Aeronautical University* (**49**, 4, p. 1039) Article

C12-109 Optimization of a Single-Slotted Lined Flap for Wing Trailing-Edge Noise Reduction. Damiano Casalino and Mattia Barbarino, *Centro Italiano Richerche Aerospaziali*, Italy (**49**, 4, p. 1051) Article

C12-110 Real-Time Aerodynamic Parameter Estimation Without Airflow Angle Measurements. Eugene A. Morelli, *NASA Langley Research Center* (**49**, 4, p. 1064) Article

C12-111 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Frequency Domain. Satyajit S. Ghoman, *Virginia Polytechnic Institute and State University*; and M. Salim Azzouz, *Midwestern State University* (**49**, 4, p. 1075) Article

C12-112 Adjoint Optimization of a Wing Using the Class-Shape-Refinement-Transformation Method. Michiel H. Straathof and Michel J. van Tooren, *Delft University of Technology*, The Netherlands (**49**, 4, p. 1091) Article

C12-113 FENSAP-ICE: Unsteady Conjugate Heat Transfer Simulation of Electrothermal De-Icing. Thomas Reid and Guido S. Baruzzi, *Newmerical Technologies International*, Canada; and Wagdi G. Habashi, *McGill University*, Canada (**49**, 4, p. 1101) Article

C12-114 Modeling the Nonlinear Dynamic Roll of Generic Fighter Using Delayed Detached-Eddy Simulation. Tiger L. Jeans and Adam Jirásek, *U.S. Air Force Academy*; David R. McDaniel, *University of Alabama at Birmingham*; and Keith Bergeron and Russell M. Cummings, *U.S. Air Force Academy* (**49**, 4, p. 1110) Article

C12-115 Nonlinear Large Angle Solutions of the Blade Element Momentum Theory Propeller Equations. Stephen A. Whitmore and Robert S. Merrill, *Utah State University* (**49**, 4, p. 1126) Article

C12-116 Free Vibrations of Composite Base Plates Stiffened by Two Adhesively Bonded Plate Strips. Jaber Javanshir, Touraj Farsadi, and Umer Yuceoglu, *Middle East Technical University*, Turkey (**49**, 4, p. 1135) Article

C12-117 Multi-Objective Optimization for the Multiphase Design of Active Polymorphing Wings. D. D. Smith, *University of Bristol*, Great Britain; R. M. Ajaj, *Swansea University*, Great Britain; A. T. Isikveren, *Bauhaus Luftfahrt e.V.*, Germany; and M. I. Friswell, *Swansea University*, Great Britain (**49**, 4, p. 1153) Article

C12-118 Pilot Performance in Centrifuge-Based Simulation of Unusual Attitude Recovery. W. D. Ledegang and E. L. Groen, *TNO*, The Netherlands; and M. Wentink, *DESDEMONA*, The Netherlands (**49**, 4, p. 1161) Article

C12-119 Modal Analysis of the Aircraft Hydraulic-System Pipeline. Xiaoping Ouyang, Feng Gao, and Huayong Yang, *State Key Laboratory of Fluid Power Transmission and Control, Zhejiang University*, China (PRC); and Hongxin Wang, *Commercial Aircraft Corporation of China, Ltd.*, China (PRC) (**49**, 4, p. 1168) Article

C12-120 Uncertainty Quantification of Two-Dimensional Wake Vortices Near the Ground. J. L. Sereno and J. C. Pereira, *Instituto Superior Técnico*, Portugal (**49**, 4, p. 1175) Technical Note

C12-121 Supersonic Aerothermoelastic Nonlinear Flutter Study of Curved Panels: Time Domain. Satyajit S. Ghoman, *Virginia Polytechnic Institute and State University*; and M. Salim Azzouz, *Midwestern State University* (**49**, 4, p. 1178) Technical Note

C12-122 Autorotational Spin Evolving Toward Chaos. Manish R. Wankhede and Nandan K. Sinha, *Indian Institute of Technology*, India (**49**, 4, p. 1183) Technical Note

C12-123 How Structural Model Variability Influences Transonic Aeroelastic Stability. S. Marques, K. J. Badcock, H. H. Khodaparast, and J. E. Mottershead, *University of Liverpool*, Great Britain (**49**, 5, p. 1189) Article

C12-124 Design-Informatics Approach for Intimate Configuration of Silent Supersonic Technology Demonstrator. Kazuhisa Chiba, Yoshikazu Makino, and Takeshi Takatoya, *Japan Aerospace Exploration Agency*, Japan (**49**, 5, p. 1200) Article

C12-125 Hydromechanical Analysis of a Fluid–Elastomeric Lag Damper Incorporating Temperature Effects. Grum T. Ngatu and Norman M. Wereley, *University of Maryland*; and Curt S. Kothera, *Techno-Sciences, Inc.* (**49**, 5, p. 1212) Article

C12-126 Experimental Study into the Flow Physics of Three-Dimensional Shock Control Bumps. P. J. Bruce and H. Babinsky, *University of Cambridge*, Great Britain (**49**, 5, p. 1222) Article

C12-127 Methodology for Conducting Scaled Sonic-Boom Flight Tests Using Unmanned Aircraft Systems. Timothy P. Jung, Ryan P. Starkey, and Brian Argrow, *University of Colorado* (**49**, 5, p. 1234) Article

C12-128 Self-Monitoring Activities for Autonomous Fight Data Analysis. Miguel A. Morales, *Computer Sciences Corporation*; and David J. Haas, *U.S. Naval Surface Warfare Center* (**49**, 5, p. 1245) Article

C12-129 Multifidelity, Multistrategy, and Multidisciplinary Design Optimization Environment. Satyajit S. Ghoman and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; P. C. Chen and Darius Sarhaddi, *ZONA Technology, Inc.*; and D. H. Lee, *General Atomics Aeronautical Systems, Inc.* (**49**, 5, p. 1255) Article

C12-130 Aerodynamic Loading Characteristics of a Model-Scale Helicopter in a Ship's Airwake. Christopher H. Kääriä, Yaxing Wang, and Gareth D. Padfield, *University of Liverpool*, Great Britain; James S. Forrest, *PRISM Defence*, Australia; and Ieuan Owen, *University of Lincoln*, Great Britain (**49**, 5, p. 1271) Article

C12-131 Wing–Body Circulation Control by Means of a Fuselage Trailing Edge. R. J. Huyssen, *North-West University (Pretoria Campus)*, South Africa; G. R. Spedding, *University of Southern California*; and E. H. Mathews and L. Liebenberg, *North-West University (Pretoria Campus)*, South Africa (**49**, 5, p. 1279) Article

C12-132 Quantitative Prediction of the Idealized Performance of Aircraft with Outboard-Horizontal Stabilizers. John A. Kentfield, *University of Calgary*, Canada (**49**, 5, p. 1290) Article

C12-133 Numerical Investigation on Aerodynamic Characteristics of a Compound Wing-in-Ground Effect. Saeed Jamei, Adi Maimun, Shuhaimi Mansor, Nor Azwadi, and Agoes Priyanto, *Universiti Teknologi Malaysia*, Malaysia (**49**, 5, p. 1297) Article

C12-134 Experimental Study of an Extremely Flexible Rotor for Microhelicopters. Jérôme Sicard and Jayant Sirohi, *University of Texas at Austin* (**49**, 5, p. 1306) Article

C12-135 Unsteady Aerodynamics of a Morphing Tandem-Wing Unmanned Aerial Vehicle. G. Q. Zhang and S. C. Yu, *Nanyang Technological University*, Singapore (ROS) (**49**, 5, p. 1315) Article

C12-136 Influence of Offdesign Performance on Design Synthesis of Laminar Aircraft. Tim Lammering, Eckhard Anton, Kristof Risse, Katharina Franza, and Ralf Hoernschemeyer, *RWTH Aachen University*, Germany (**49**, 5, p. 1324) Article

C12-137 Numerical Analysis of Effects of Leading-Edge Protuberances on Aircraft Wing Performance. Anil K. Malipeddi, Niloufar Mahmoudnejad, and Klaus A. Hoffmann, *Wichita State University* (**49**, 5, p. 1336) Article

C12-138 Computation of Flow Field Around an Airfoil with Leading-Edge Protuberances. A. Dropkin, *Naval Undersea Warfare Center*; D. Custodio, *Worcester Polytechnic Institute*; C. W. Henoch, *Naval Undersea Warfare Center*; and H. Johari, *California State University* (**49**, 5, p. 1345) Article

C12-139 Complete Computational Fluid Dynamics Analysis of a Velocity XL with Flight-Test Verification. Shane M. Schouten and William S. Saric, *Texas A&M University* (**49**, 5, p. 1356) Article

C12-140 Tradeoff Between Contrail Reduction and Emissions in United States National Airspace. Neil Y. Chen and Banavar Sridhar, *NASA Ames Research Center*; and Hok K. Ng, *University of California, Santa Cruz* (**49**, 5, p. 1367) Article

C12-141 Assisting Air Traffic Controllers in Planning and Monitoring Continuous-Descent Approaches. A. van der Eijk, *To70 B.V.*, The Netherlands; C. Borst, A. C. in 't Veld, M. M. van Paassen, and M. Mulder, *Delft University of Technology*, The Netherlands (**49**, 5, p. 1376) Article

C12-142 Parafoil Control Authority with Upper-Surface Canopy Spoilers. Alek Gavrilovski, Michael Ward, and Mark Costello, *Georgia Institute of Technology* (**49**, 5, p. 1391) Article

C12-143 Review of the F-16 Individual Aircraft Tracking Program. Hongchul Lee and Hwanjeong Cho, *Republic of Korea Air Force*, South Korea (ROK); and Seungbae Park, *State University of New York at Binghamton* (**49**, 5, p. 1398) Article

C12-144 Numerical Study of Active Flow Control on a High-Lift Configuration. Tobias Höll, Alexander Kabat vel Job, Pablo Giacopinelli, and Frank Thiele, *Berlin Institute of Technology*, Germany (**49**, 5, p. 1406) Article

C12-145 Aerodynamic and Aeroacoustic Analysis of Installed Pusher-Propeller Aircraft Configurations. Jianping Yin and Arne Stuermer, *DLR, German Aerospace Research Center*, Germany; and Marco Aversano, *Piaggio Aero Industries SpA*, Italy (**49**, 5, p. 1423) Article

C12-146 Airfoil Thickness Effects on the Thrust Generation of Plunging Airfoils. Meilin Yu, Z. J. Wang, and Hui Hu, *Iowa State University* (**49**, 5, p. 1434) Article

C12-147 In Situ Velocity Measurements in the Near Wake of a Ship Superstructure. Cody J. Brownell, Luksa Luznik, Murray R. Snyder, and Hyung S. Kang, *U.S. Naval Academy*; and Colin H. Wilkinson, *Zenetex LLC* (**49**, 5, p. 1440) Article

C12-148 Design and Application of Cross-Shaped Cellular Honeycombs for a Variable-Camber Wing. Li Zhou and Ping Zhang, *Nanjing University of Aeronautics and Astronautics*, China (PRC); and Tao Qiu, *Aviation Industry Corporation of China*, China (PRC) (**49**, 5, p. 1451) Article

C12-149 Optimization of Unpowered Descents of Commercial Aircraft in Altitude-Dependent Winds. Antonio Franco, Damián Rivas, and Alfonso Valenzuela, *University of Seville*, Spain (**49**, 5, p. 1460) Article

C12-150 Fast Unstructured-Mesh Finite-Element Method for Nonlinear Subsonic Flow. David Eller, *Royal Institute of Technology*, Sweden (**49**, 5, p. 1471) Article

C12-151 Rapid-Prototyping Method for Modeling a Circulation-Control Wing at Low Speeds. Hongjun Ran, Dimitri N. Mavris, and Michelle Kirby, *Georgia Institute of Technology* (**49**, 5, p. 1480) Article

C12-152 Entropy-Based Drag-Error Estimation and Mesh Adaptation in Two Dimensions. Krzysztof J. Fidkowski, Marco A. Ceze, and Philip L. Roe, *University of Michigan* (**49**, 5, p. 1485) Article

C12-153 Stereoscopic Particle-Image-Velocimetry-Based Integral Load Determination on an Aircraft Propeller. D. Ragni, B. W. van Oudheusden, and F. Scarano, *Delft University of Technology*, The Netherlands (**49**, 5, p. 1497) Article

C12-154 Triform Wing/Body Loading. J. Morote and G. Liaño, *National Institute of Aerospace Technology*, Spain (**49**, 5, p. 1507) Article

C12-155 Study of Bird Strikes Using Smooth Particle Hydrodynamics and Stochastic Parametric Evaluation. V. P. Bheemreddy and K. Chandrasekhara, *Missouri University of Science and Technology* (**49**, 5, p. 1513) Article

C12-156 Integrated Aerodynamic Thermal Structure Design Optimization Method of Lifting Surfaces. Huaguang Zhu, Li Liu, Sida Zhou, and Yulin Li, *Beijing Institute of Technology*, China (PRC) (**49**, 5, p. 1521) Technical Note

C12-157 Drag Reduction for Sweptback Grid Fin with Blunt and Sharp Leading Edges. Yan Zeng, *Nanyang Technological University*, Singapore (ROS) (**49**, 5, p. 1526) Technical Note

C12-158 Determination of the Terminal Shock in Two-Dimensional Supersonic Inlets. Hongjun Ran, Russell Deany, and Dimitri N. Mavris, *Georgia Institute of Technology* (**49**, 5, p. 1532) Technical Note

C12-159 Numerical Simulation of Rotor Flowfields Based on Several Spatial Discretization Schemes. Yihua Cao and Ming Zhao, *Beihang University*, China (PRC) (**49**, 5, p. 1535) Technical Note

C12-160 Integrated Computational/Experimental Approach to Unmanned Combat Air Vehicle Stability and Control Estimation. Russell M. Cummings, *U.S. Air Force Academy*; and Andreas Schütte, *DLR, German Aerospace Research Center*, Germany (**49**, 6, p. 1542) Article

C12-161 Static and Forced-Oscillation Tests of a Generic Unmanned Combat Air Vehicle. Dan D. Vicroy, *NASA Langley Research Center*; Thomas D. Loeser, *German–Dutch Wind Tunnels*, Germany; and Andreas Schütte, *DLR, German Aerospace Center*, Germany (**49**, 6, p. 1558) Article

C12-162 Stereoscopic Particle Image Velocimetry Flowfield Investigation of an Unmanned Combat Air Vehicle. E. W. Roosenboom, R. Konrath, A. Schröder, D. Pallek, and D. Otter, *DLR, German Aerospace Center*, Germany; and S. Morgand, A. Gilliot, J. C. Monnier, J. F. Le Roy, C. Geiler, and J. Pruvost, *ONERA-The French Aerospace Lab*, France (**49**, 6, p. 1584) Article

C12-163 Stability and Control Analysis for an Unmanned Aircraft Configuration Using System-Identification Techniques. Detlef Rohlf, *DLR-German Aerospace Center*, Germany; Stefan Schmidt, *Defence Science and Technology Organisation*, Australia; and Jonathan Irving, *BAE Systems*, Great Britain (**49**, 6, p. 1597) Article

C12-164 Engineering Methods Applied to an Unmanned Combat Air Vehicle Configuration. Maximilian Tomac and Arthur Rizzi, *Royal Institute of Technology*, Sweden; Raj K. Nangia, *Nangia Aero Research Associates*, Great Britain; and Michael R. Mendenhall and Stanley C. Perkins, *Nielsen Engineering and Research, Inc.* (**49**, 6, p. 1610) Article

C12-165 Three Unstructured Computational Fluid Dynamics Studies on Generic Unmanned Combat Aerial Vehicle. Neal T. Frink, *NASA Langley Research Center*; Magnus Tormalm, *Swedish Defense Research Agency*, Sweden, and Stefan Schmidt, *Defense Science and Technology Organization*, Australia (**49**, 6, p. 1619) Article

C12-166 Flow Physics Analyses of a Generic Unmanned Combat Aerial Vehicle Configuration. Andreas Schütte, *DLR, German Aerospace Center*, Germany; Dietrich Hummel, *Technische Universität Braunschweig*, Germany; and Stephan M. Hitzel, *EADS*, Germany (**49**, 6, p. 1638) Article

C12-167 Unmanned Air Systems: Challenge and Opportunity. Michael S. Francis, *United Technologies Research Center* (**49**, 6, p. 1652) Lecture

C12-168 Effectiveness of Wing Twist Morphing in Roll Control. R. Pecora, F. Amoroso, and L. Lecce, *University of Naples "Federico II"*, Italy (**49**, 6, p. 1666) Article

C12-169 Computational Aeroelastic Simulation of Rapidly Morphing Air Vehicles. Evgenny Selitrennik and Moti Karpel, *Technion–Israel Institute of Technology*, Israel; and Yuval Levy, *Israeli Computational Fluid Dynamics Center*, Israel (**49**, 6, p. 1675) Article

C12-170 Shape, Structure, and Kinematic Parameterization of a Power-Optimal Hovering Wing. Bret Stanford, *U.S. Air Force Research Laboratory*; Mohammad Kurdi, *Pennsylvania State University*; and Philip Beran and Aaron McClung, *U.S. Air Force Research Laboratory* (**49**, 6, p. 1687) Article

C12-171 Hybrid Reynolds-Averaged Navier–Stokes/Large-Eddy Simulation Investigating Control of Flow over a Turret. Philip E. Morgan and Miguel R. Visbal, *U.S. Air Force Research Laboratory* (**49**, 6, p. 1700) Article

C12-172 Analysis of Twin Turboprop Aircraft Whirl-Flutter Stability Boundaries. J. Cecrdle, *Aeronautical Research and Test Institute*, Czech Republic (**49**, 6, p. 1718) Article

C12-173 Skin-Friction Predictions on a Hovering Tilt-Rotor Blade. Upender K. Kaul and Jasim Ahmad, *NASA Ames Research Center* (**49**, 6, p. 1726) Article

C12-174 Review of Turbulent Boundary-Layer Models for Acoustic Analysis. Teresa S. Miller, *Bombardier Learjet*; and Judith M. Gallman and Mark J. Moeller, *Spirit AeroSystems, Inc.* (**49**, 6, p. 1739) Article

C12-175 Aerodynamics of Multifunctional Transport Aircraft Devices. Ulrich Jung and Christian Breitsamter, *Technische Universität München*, Germany (**49**, 6, p. 1755) Article

C12-176 Evaluation of a Correlation-Based Transition Model and Comparison with the eN Method. Cornelia Seyfert and Andreas Krumbein, *DLR, German Aerospace Center*, Germany (**49**, 6, p. 1765) Article

C12-177 Development and Evaluation of an Automated Path Planning Aid. Robert Watts, H. Claus Christmann, Eric N. Johnson, Karen Feigh, and Panagiotis Tsiotras, *Georgia Institute of Technology* (**49**, 6, p. 1774) Article

C12-178 Concurrent Optimization of Mesh Refinement and Design Parameters in Multidisciplinary Design. Sirisha Rangavajhala, Chen Liang, Sankaran Mahadevan, and Vadiraj Hombal, *Vanderbilt University* (**49**, 6, p. 1786) Article

C12-179 Response Surface Method Application to High-Lift Configuration with Active Flow Control. Petr Vrchota and Pavel Hospodár, *VZLÚ Aeronautical Research and Test Establishment*, Czech Republic (**49**, 6, p. 1796) Article

C12-180 Reduced-Order Modeling of Transonic Flutter and Limit-Cycle Oscillations Using Sparse Volterra Series. Maciej Balajewicz and Earl Dowell, *Duke University* (**49**, 6, p. 1803) Article

C12-181 Tiltrotor Wing-Root Vibratory Loads Reduction Through Higher Harmonic Control Actuation. M. Monical Colella, G. Bernadini, and M. Gennaretti, *University Roma Tre*, Italy (**49**, 6, p. 1813) Article

C12-182 Mission Performance of the Tempest Unmanned Aircraft System in Supercell Storms. Jason Roadman, Jack Elston, Brian Argrow, and Eric Frew, *University of Colorado* (**49**, 6, p. 1821) Article

C12-183 Performance Flexibility of Reconfigurable Families of Unmanned Aerial Vehicles. Michael D. Patterson, David J. Pate, and Brian J. German, *Georgia Institute of Technology* (**49**, 6, p. 1831) Article

C12-184 Multidisciplinary Design Optimization of Medium-Range Transonic Truss-Braced Wing Transport Aircraft. Nicholas A. Meadows, Joseph A. Schetz, Rakesh K. Kapania, Manav Bhatia, and Guclu Seber, *Virginia Polytechnic Institute and State University* (**49**, 6, p. 1844) Article

C12-185 Flight Test Maneuvers for Efficient Aerodynamic Modeling. Eugene A. Morelli, *NASA Langley Research Center* (**49**, 6, p. 1857) Article

C12-186 Experimental and Numerical Investigation of a Contra-rotating Open-Rotor Flowfield. Arne Stürmer, Carlos O. Marquez Gutierrez, Eric W. Roosenboom, Andreas Schröder, Reinhard Geisler, Dieter Pallek, and Janos Agoc, *DLR, German Aerospace Center*, Germany; and Klaus-Peter Neitzke, *AIRBUS Operations GmbH*, Germany (**49**, 6, p. 1868) Article

C12-187 Lobe Balancing Design Method to Create Frozen Sonic Booms Using Aircraft Components. Timothy P. Jung, Ryan P. Starkey, and Brian Argrow, *University of Colorado* (**49**, 6, p. 1878) Article

C12-188 Interference Drag Modeling and Experiments for a High-Reynolds-Number Transonic Wing. Kyle C. Knight, *Virginia Polytechnic Institute and State University*; Eric Braun, *University of Texas at Arlington*; Christopher J. Roy, *Virginia Polytechnic Institute and State University*; Frank K. Lu, *University of Texas at Arlington*; and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (**49**, 6, p. 1894) Article

C12-189 Flow Control of a Slender Blunt-Nose Body at High Angles of Attack. Vijaya Sirangu and T. Terry Ng, *University of Toledo* (**49**, 6, p. 1904) Article

C12-190 Fuel Burn and CO_2 Systemwide Assessment of Environmentally Responsible Aviation Technologies. Hernando Jiminez, Holger Pfaender, and Dimitri Mavris, *Georgia Institute of Technology* (**49**, 6, p. 1913) Article

C12-191 Aircraft Shortest and Fastest Continuous-Descent Approach Development. S. Khardi, *French Institute of Science and Technology for Transport, Development, and Networks*, France (**49**, 6, p. 1931) Article

C12-192 Multibody Analysis of the Terminal Phase for a Reentry Vehicle: A Comparative Study. Giulio Avanzini, *Università del Salento*, Italy; and Giorgio Guglieri and Alberto Torasso, *Politecnico di Torino*, Italy (**49**, 6, p. 1940) Article

C12-193 Systematic Procedure for Taxi-Route Conformance Monitoring. Q. Maggie Zhang and Yiyuan J. Zhao, *University of Minnesota* (**49**, 6, p. 1953) Article

C12-194 Using a Simple Crack Growth Model in Predicting Remaining Useful Life. Alexandra Coppe, Matthew J. Pais, Raphael T. Haftka, and Nam H. Kim, *University of Florida* (**49**, 6, p. 1965) Article

C12-195 Modeling Method for Deformation Analysis in Thick Laminate Mechanical Joints. L. Liu and K. Chen, *Shanghai Jiao Tong University*, China (PRC) (**49**, 6, p. 1974) Article

C12-196 Use of a Heavy Gas for External Flowfield Modification. Stephen Corda, *University of Tennessee Space Institute* (**49**, 6, p. 1982) Article

C12-197 Optimizing Families of Reconfigurable Aircraft for Multiple Missions. David J. Pate, Brian J. German, and Michael D. Patterson, *Georgia Institute of Technology* (**49**, 6, p. 1988) Article

C12-198 Interference Effect of Engine Exhaust on Civil Aircraft Drag Performance. Weilin Zheng, Yankui Wang, Jixiang Shan, Xueying Deng, and Wei Tian, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**49**, 6, p. 2001) Article

C12-199 Effects of Sweep and Nonplanarity on a Delta-Winged Biplane. Lance W. Traub, *Embry-Riddle Aeronautical University* (**49**, 6, p. 2007) Article

C12-200 Deformation Analysis of Composite Rotor Blades for a Helicopter. Weiguo Hou, Weifang Zhang, and Xiaoliang Wang, *Beihang University*, China (PRC); and Jun Xing, *Beijing Institute of Aeronautical Materials*, China (PRC) (**49**, 6, p. 2018) Article

C12-201 Wind Effect on the Construction of Instrument Flight Procedures Using a Turkish Wind Model. Oznur Usanmaz and Enis T. Turgut, *Anadolu University*, Turkey (**49**, 6, p. 2023) Article

C12-202 Computational Study of the Embedded Engine Static Pressure Thrust Propulsion System. P. N. Peraudo, J. A. Schetz, and C. J. Roy, *Virginia Polytechnic Institute and State University* (**49**, 6, p. 2033) Article

C12-203 Numerical Simulation of Wall-Pressure Fluctuations Due to a Turbulent Boundary Layer. Niloufar Mahmoudnejad and Klaus. A. Hoffmann, *Wichita State University* (**49**, 6, p. 2046) Article

C12-204 Research on Effects of Oblique Struts on Crashworthiness of Composite Fuselage Sections. Tianchun Zou, Haolei Mou, and Zhenyu Feng, *Civil Aviation University of China*, China (PRC) (**49**, 6, p. 2059) Article

C12-205 Landing Gear Drop-Test Rig Development and Application for Light Airplanes. Cai-Jun Xue, Yu Han, Wen-Gang Qi, and Jian-Hua Dai, *Nanjing University of Aeronautics and Astronautics*, China (PRC) (**49**, 6, p. 2064) Article

C12-206 Frequency-Domain-Based Pseudosliding Mode Flight Control Design. Ronald A. Hess, *University of California, Davis* (**49**, 6, p. 2077) Article

C12-207 Application of Pattern Search in Worst-Case Flutter Solution. Yingsong Gu and Zhichun Yang, *Northwestern Polytechnical University*, China (PRC) (**49**, 6, p. 2089) Technical Note

C12-208 Test Technique for the Measurement of Intake Drag of Airbreathing Vehicles. N. B. Mathur and Sajeer Ahmed, *National Aerospace Laboratories*, India (**49**, 6, p. 2092) Technical Note

C12-209 Numerical Investigation of a NACA 0012 Airfoil in Oscillatory Motions. Zhidong Fu, Yongsheng Cheng, and Hong Liu, *Shanghai Jiao Tong University*, China (PRC) (**49**, 6, p. 2095) Technical Note

C12-210 Modeling the Pilot Detection of Time-Varying Aircraft Dynamics. Ronald A. Hess, *University of California, Davis* (**49**, 6, p. 2100) Technical Note
